**P - 001**

**Subject:** Co-financing of the project « Planning and Financing Adaptation in Niger »

Dear Mr. Kurukulasuriya,

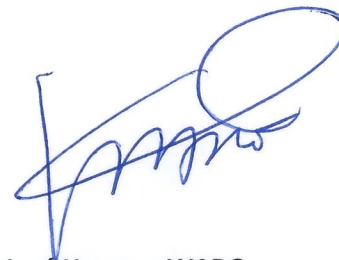

The United Nations Development Programme (UNDP) in Niger assists the Government through the Country Programme Document (CPD), which gives great importance to strengthening the climate change resilience of populations and institutions.

In this context, UNDP has supported the Government to mobilize the necessary resources from the Green Climate Fund (GCF) for the implementation of the project "National Adaptation Plan-Advancing, medium- and long-term adaptation planning and budgeting in Niger (NAP)". This project was designed to complement the "Planning and financing adaptation in Niger" project. UNDP hereby confirms its commitment to provide in-kind co-financing for the project "Planning and financing adaptation in Niger" for USD 2,997,282 through the complementary and synergistic implementation of the project "National Adaptation Plan-Advancing medium- and long-term adaptation planning and budgeting in Niger (NAP)".

In addition, since the objective of the "Planning and financing adaptation in Niger" project is aligned with the CPD's strategic areas of intervention, UNDP commits to contribute to the implementation of the project with grant co-financing of US\$ 500,000 using its core funds (TRAC).

Therefore, the total amount of UNDP co-financing for the "Planning and financing adaptation in Niger" is US\$ 3,497,282.

Please accept, Sir, my best regards.

**José Herman WABO**  
Resident Representative a.i.
