Co-financing amount		USD 1,234,000		

Date of CEO Endorsement		12 May 2016
Start of Implementation		16 September 2016
Date of first disbursement		29 December 2016
Total disbursement as of 30 June 2022		USD 1,244,245.18
Total expenditure as of 30 June 2022		USD 1,309,121.09
Expected Mid-Term Review Date		August 2021 (Waived)
Completion Date	Planned	31 December 2020
	Revised	31 December 2022
Expected Terminal Evaluation Date		31 January 2023
Expected Financial Closure Date		31 Dec 2023

#### 1.2. Project description

The ABS Regional Project is being implemented by UN Environment (UNEP) and executed by SPREP in 14 PICs. These countries are Cook Islands, Federated States of Micronesia, Fiji, Kiribati, Marshall Islands, Palau, Papua New Guinea, Samoa, Solomon Islands, Tonga, Tuvalu and Vanuatu. The main objective of the project is to help countries from the Pacific region in the ratification of the Nagoya Protocol on Access to Genetic Resources and Benefit Sharing, build legal and technical capacity to implement and operationalize the Protocol domestically and to improve awareness, communication and education on access and benefit sharing issues in the Pacific. The project execution officially began following the Project Inception held in July 2017 in Apia, Samoa. The closing date for the project as per official project document was at 31<sup>st</sup> December, 2020, which has been extended till 31<sup>st</sup> December 2022.

The four components of the project are as follows:

**Component 1**: baseline analysis to identify common assets (particularly relating to traditional knowledge), issues and needs between countries

**Component 2**: assist countries to ratify the Protocol through supporting national authorities. It includes scoping studies to identify any gaps in existing laws and regulations at national level, analyses of implications of ratification, public awareness of the Protocol and consultation with policy makers

**Component 3**: establish an enabling environment for the implementation of basic provisions of the Protocol. It includes stocktaking and assessment of capacities and systems currently in place, development or review of strategy and action plans for the implementation of ABS measures and building capacity among stakeholders; and

**Component 4**: addresses regional coordination and technical support.

#### 1.3. History of project revisions

To be completed by Task Managers

Version	Date	Main changes introduced in this revision
Rev0 (CEO ED)	31 Aug 2016	N/A

:	
:	
RevN (latest version at the time of this PIF)	

### 2. OVERVIEW OF PROJECT STATUS

# To be completed by UNEP Task Manager

Insert the Subprogramme(s) and biennia of the PoW to which the project contributes SP4: Environmental Governance	Specify the relevant Expected Accomplishment(s) & Indicator(s) SP4 EA (a): The international community increasingly converges on common and integrated approaches to achieve environmental objectives and implement the 2030 Agenda for Sustainable Development Indicator (ii): Uptake of approaches for the coherent implementation of multilateral environmental agreements or other multilateral institutional mechanisms as a
	result of UNEP support <b>SP4 EA (b):</b> Institutional capacities and policy and/or legal frameworks enhanced to achieve internationally agreed environmental goals, including the 2030 Agenda for Sustainable Development and the SDGs <b>Indicator (i):</b> The number of countries that have enhanced institutional capacity and legal frameworks to fully implement the
	nultilateral environmental agreements and to achieve internationally agreed environmental goals, including the SDGs as a result of UNEP support

Describe any progress made towards delivering the stated PoW Expected Accomplishments and Indicators. State key changes since previous reporting period. (maximum one paragraph)

The project supports common for the coherent implementation of the Nagoya Protocol on Access to Genetic Resources and the Fair and Equitable Sharing of Benefits Arising from their Utilization to the Convention on Biological Diversity is an international agreement which aims at sharing the benefits arising from the utilization of genetic resources in a fair and equitable way.

To date, through support provided by the project, ten out of fourteen countries in the Pacific have ratified the Nagoya Protocol, one country has completed the domestic process for ratification and awaiting deposition of the instrument of accession and the other remaining three have completed national capacity building and are currently conducting internal

consultations for ratification in near future. [Please note the previous PIR had counted PNG has having ratified however it has been now confirmed that their deposition of instrument of accession hasn't been done till date. Developing capacity of countries in the Pacific region to fully implement the Nagoya Protocol is one of the main outcomes of the project.

Expected Accomplishment	Indicator	Progress
<b>SP4 EA (a):</b> The international community increasingly converges on common and integrated approaches to achieve environmental objectives and implement the 2030 Agenda for Sustainable Development	(ii): Uptake of approaches for the coherent implementation of multilateral environmental agreements or other multilateral institutional mechanisms as a result of UNEP support	Ongoing: This project supports common for the coherent implementation of the Nagoya Protocol on Access to Genetic Resources and the Fair and Equitable Sharing of Benefits Arising from their Utilization to the Convention on Biological Diversity is an international agreement.
<b>SP4 EA (b):</b> Institutional capacities and policy and/or legal frameworks enhanced to achieve internationally agreed environmental goals, including the 2030 Agenda for Sustainable Development and the SDGs	(i): The number of countries that have enhanced institutional capacity and legal frameworks to fully implement the multilateral environmental agreements and to achieve internationally agreed environmental goals, including the SDGs as a result of UNEP support	Ongoing: To date, through support provided by the project, ten out of fourteen countries in the Pacific have ratified and one country having completed all domestic requirements for ratification and awaiting deposition of instruments of accession to the Nagoya Protocol.

[Section to be shared with relevant Regional and Global SubProgramme Coordinators]

#### 2.2. GEF Core Indicators (for all GEF 6 and later projects): This is GEF-5 project

GEF Core Indicators	Indicative expected Results
Discuss GEF core indicators targeted by the proj paragraph)	ect, as well as expected results. (maximum one
Indicator	Expected values at

outcomes (section	S	S	S	S	S
3.1)					
Rating towards outputs (section 3.2)	S	S	S	S	S
<b>Risk</b> rating (section 3.3)	L	L	L	L	L

lines; select H; S; M; L; to rate risks for the fiscal year you are reporting in the fifth line. Add more columns if needed]

Summary of status. Please structure as follows, highlighting progress, challenges and main achievements, as needed:

The project has made significant progress since the last reporting period. Despite most of 2021'remained under lock down and state of emergency continue to be in place in many Pacific Island countries (due to COVID 19), it was apparent that there would be further delays in getting business to normal and therefore the Project must make serious plans to deliver project outputs virtually. This wasn't so difficult because the project had already anticipated this and was prepared to deal with the situation unlike in the previous year. Country workshops and regional webinars were held virtually to support capacity building measures and to provide technical assistance in the implementation of Nagoya Protocol. Microsoft Teams, Skype, emails, zoom and telephonic conversations led to success of the virtual workshops which were largely held on the zoom platform. A hybrid nature of these workshops was carried out in countries with in-person workshop at a local meeting venue (with national partners attending in line with national COVID safe measures) and the Project Technical Team and experts joining remotely. A local government official identified to coordinate in the conference room worked closely with the experts that were available full time online during the course of the workshop.

The progress of the ABS Regional Project was provided at the monthly staff meeting of the Islands Oceans and Ecosystems Department. On a weekly basis the Project Manager held meetings every Monday with the Project Team on the progress of the activities and any specific issue of concern. By end of the current reporting period all major activities for the project had been completed.

The major achievements are the regional conference on Traditional Knowledge and ABS, launching of the regional access and benefit sharing guidelines for the Pacific and ABS Lessons Learned Technical Report from the Pacific. The major challenges were related to COVID 19. Since the project was closing in June 2022 and many countries were still under state of emergencies and with international borders closed, implementing some of the activities were very difficult.

<u>Rating towards outcomes</u>: The rating is "**S**" because all major outputs had been delivered in this period. These are national capacity building workshops, regional conference on the associated traditional knowledge and benefit sharing, launching of the access and benefit sharing regional guidelines and ABS lessons learnt technical report from the Pacific. Although no additional countries have ratified since last reporting period, it must be noted that to date the project has

got 10 of the 14 countries having ratified already. Of the remaining 4 countries, Papua New Guinea is already in the process and the other three have indicated they needed more time for consultation.

<u>Rating towards outputs</u>: The rating is "S" with all major outputs having been achieved.

<u>Overall risk rating: justify consolidated project risk given on Table A in section 3.3.</u> The overall risk is rated to be "L" because despite all challenges, the experiences and lessons learnt from the previous year (as per the last PIR), the project had well prepared and planned for the similar situation and thus no significant impact on delivery of outcomes were noted.

[section will be uploaded into the GEF Portal]

#### 2.4. Co-financing

Planned Co-finance Total: (total only)	<ul> <li>The overall project budget for the project</li> <li>Cost to the GEF Trust Fund</li> <li>Co-financing Total</li> </ul>	is \$1,762,557.00 \$1,234,000.00	51% 49%
Actual to date: Complete (in \$ and %.	The total expenditure as of March 2022.	\$1,244,245.66	
State the date for which this value is valid)	The end date for project implementation page 2022.	period is on the 31 <sup>st</sup> Dec	cember

Stakeholder engagement	Describe progress, challenges and outcomes on stakeholder engagement (based on the description of the Stakeholder engagement plan included at CEO endorsement). For older projects that did not have a Stakeholder Engagement Plan in the CEO Endorsement Document, simply mention any kind of stakeholder engagement activities undertaken during the reporting period.
	The Project has established a large stakeholder base in the Pacific Region. Some stakeholders have been working on access and benefit sharing in the region for many years while others have been added to the list more recently from project collaborations. By providing technical support and facilitating country workshops, the project has been able to build inroads in adding more national ABS stakeholders especially in countries that have many ABS players such as Fiji, Papua New Guinea, Vanuatu and Solomon Islands. The Project provided support, guidance and technical assistance to all these partners in the ABS National workshops that were organized by National ABS Focal Points and during the workshop networking also happened between SPREP and these stakeholders. The associated traditional knowledge and biodiversity conservation for sustainable development goals conference brought together a broad range of stakeholders represented by over 200 individuals from different organizations.

#### 2.5. Stakeholder engagement

These	were from scientific and technical organizations, academia,
	ch organizations, private sector, government and non-
	ment, faith groups, community resource owners and youths.
0	aggement of stakeholders has been carefully planned and in
	th project communication guidelines. As the project draws to
	nclusion in few months, the stakeholder list is most robust, wide
	clusive ever. This huge stakeholder list will be used as part of
	g collaborations in the future.
Ŭ	
The st	akeholders have been engaged in the following ways:
1)	Validating country consultations
2)	Providing opinions/ comments in technical discussions
3)	Sharing lessons learnt, experiences and examples of their work
	related to ABS
4)	Identification of priorities for ABS issues in the Pacific
5)	Providing comments to draft documents / reports
	[section will be uploaded into the GEF Portal]

2.6.	Gender	

2.6. Gender	
Gender mainstreaming	Gender consideration has featured prominently in the implementation of the project. SPREP has a Gender Policy and the Project is required to follow the Gender & Social Inclusion (GESI): Guiding Document in activities dealing with the project, particularly national / regional workshops. The guiding document is available at https://www.sprep.org/publications/gender-social-inclusion-gesi- guiding-document Careful thinking and planning are done to ensure gender balance in the panel of speakers (experts) for conferences and for all participants that are invited to attend ABS workshops, conferences and meetings. A gender report is prepared and shared internally to ensure that the meeting followed the internal guideline on gender considerations. A email with a copy of the guideline is also shared to all presenters to ensure that they comply with the SPREP's gender policy. Efforts has also been made to ensure that equal opportunity is given to both men and women for all project related activities.
	to both men and women for all project related activities. [section will be uploaded into the GEF Portal]

#### 2.7. Environmental and social safeguards management

Environmental and social safeguards	Describe progress, challenges and outcomes related to the environmental and social safeguard-responsive measures documented
management	at CEO Endorsement/ Approval in social safeguard action plan or equivalent. Older projects that were designed before environmental and social safeguard mainstreaming should proactively report any possible social safeguard benefits, as appropriate.

The activities of the project are to support the implementation of the third objective of the Convention of Biological Diversity. Despite this, the Executing Agency, SPREP has stringent policies in place to avoid, prevent, minimize, mitigate, manage and to compensate adverse impacts that Regional ABS Project may have on people or the environment throughout the project or program cycle, thereby enhancing the environmental and social outcomes.
SPREP in itself is a regional organization that supports environmental governance, climate change, waste management, biodiversity conservation and progress towards sustainable development in general. This project addresses the importance of biodiversity conservation and fulfilling the objectives of the Convention on Biological Diversity through its facilitation of the implementation of the Nagoya Protocol. As a cross-cutting issue it also supports the conservation of globally significant biodiversity and sustainable use of the components of globally significant biodiversity in small island nations. The project has significantly moved forward towards achieving positive environmental and social impacts by integrating ABS implementation mechanisms within government policies and plans, and no unintended negative impacts to people and the environment are foreseen from the implementation of proposed project activities. Using communication tools and awareness materials the project has been reaching out to all key stakeholders so that the participation of local communities in the PIC processes and in the negotiation of ABS agreements to ensure fair and equitable sharing of benefits deriving from the use of genetic resources and traditional knowledge, and thus the accrual of economic and social benefits at the local level are ensured.
[section will be uploaded into the GEF Portal]

#### 2.8. Knowledge management

2.0. Knowledge manage	
Knowledge activities and products	Provide a narrative of knowledge activities/ products (when applicable), as outlined in knowledge management approved at CEO Endorsement/ Approval
	The Regional ABS Project has reproduced communication materials that were developed in the early implementation period for countries to use. These materials were requested by countries for communication and awareness during national consultations / workshops. All these materials also shared on the ABS Webpage of the Project at <u>www.sprep.org/abs</u> and shared via ABS Clearing House. These materials are also available on the ABS CH at the following link <u>https://absch.cbd.int/en/database/ORG/ABSCH-ORG-SCBD-206945/1</u>

Other materials provided by the Project are soft copies of technical reports and documents in USB drive for countries, Promotional materials to increase visibility in the Pacific have also been produced such as water bottles, facemasks, hand sanitizers, key tags and reusable tote bags. These materials were distributed during the regional traditional knowledge forum held in Suva, Fiji. The objective of the meeting was to have an open dialogue to share experiences, and challenges and explore opportunities in addressing biodiversity conservation goals in the Pacific with a focus on linkages to traditional knowledge and sustainable development goals.
The conference was the first-ever "Dialogue Forum" on Traditional Knowledge for Biodiversity and Sustainable Development Goals (SDGs) in the Pacific 30 May – 1st of June 2022 at the Grand Pacific Hotel, Suva. The meeting was held face to face but was accessible virtually for countries and participants) that were unable to attend in person.
The meeting brought together officials from the government, non- government and civil society groups, research organizations and academia, the private sector, development partners, and community representatives to discuss how traditional knowledge associated with biodiversity can be protected and used for achieving sustainable developments goals of the Pacific.
A desk calendar highlighting project activities, photos and quotes from Nagoya Protocol has also been produced by the project and shared with key stakeholders.
[section will be uploaded into the GEF Portal]

#### 2.9. Stories to be shared

Stories to be shared	Optional for mature projects: Provide a brief summary of any especially interesting and impactful project results that are worth sharing with a larger audience, and/or investing communications time in, if any.
	1. Pacific Regional Guidelines for effective implementation of the Nagoya Protocol.
	SPREP has developed the Regional Guidelines to help countries implement compliance measures and various challenges. These challenges were highlighted during country consultations, meetings, workshops and with requests made for technical assistance.
	There are gaps and challenges in establishing compliance mechanisms in countries. These are due to lack of awareness and technical capacity to implement key provisions of the protocol.

- Furthermore, many relevant institutions are not (entirely) operational, and authorities lack the confidence to engage in Access actively and Benefit Sharing issues, including being nonresponsive to questions from researchers and users of genetic resources and associated traditional knowledge.
  - The goal of the SPREP through the ABS Regional Project is to create a "Research and Development" friendly Pacific on rich flora and fauna in the Pacific, particularly in relation to Biodiscoveries with necessary safeguards, protection and best practices for access and benefit sharing. This also ties with the objective of the conference on Traditional Knowledge, Biodiversity and Sustainable Development.

#### 2. Lessons Learned Report

SPREP also launched the ABS Lessons Learned Report, a documentation of examples, experiences and shared challenges in the pacific Island countries. The ABS Regional project began execution of activities in the region in 2017. Since then, numerous country consultations, meetings, capacity building sessions have been held in these countries. This report captures key issues that have emerged in the Pacific in implementation of the Nagoya Protocol

[section to be shared with communication division/ GEF communication]

#### 3. PROJECT PERFORMANCE AND RISK

Based on inputs by the Project Manager, the UNEP Task Manager<sup>1</sup> will make an overall assessment and provide ratings of:

- (i) Progress towards achieving the project Results(s)- see section 3.1
- (ii) Implementation progress see section 3.2

Section 3.3 on Risk should be first completed by the Project Manager. The UNEP Task Manager will subsequently enter his/her own ratings in the appropriate column.

#### 3.1 Rating of progress towards achieving the project outcomes

[copy and paste the CEO Endorsement (or latest formal Revision) approved Results Framework, adding/deleting outcome rows, as appropriate]

<sup>&</sup>lt;sup>1</sup> For joint projects and where applicable ratings should also be discussed with the Task Manager of co-implementing agency.

#### 3.2 Rating of progress implementation towards delivery of outputs

Outputs/Activities <sup>3</sup>	Expected completion date <sup>4</sup>	Implementation status as of 30 June 2021 (%)	Implementation status as of 30 June 2023 (%)	Progress rating justification <sup>5</sup> , description of challenges faced and explanations for any delay	Progress rating <sup>6</sup>
Output 1.2.1 New policy directions for individual countries and the region identified and communicated via existing means (e.g. during the execution of the project and future SPREP/UNEP support mechanisms).	June 2018	95%	100%	ABS Regional Guidelines have been developed and shared with all countries. Furthermore, Technical report highlighting lessons learned and case studies / best practices has also been completed and shared via ABS-CH.	HS
Output 2.1.3 National ABS law/regulation/policy proposals drafted and submitted for approval to competent authorities and draft documentation for ratification prepared and submitted to the appropriate authorities		80%	95%	<ul> <li>Fiji, Samoa, Palau, Vanuatu, RMI, Solomon Islands, Cook Islands have draft / completed development of a legal framework to address ABS issue sin respective countries.</li> <li>PNG, Tuvalu &amp; Tonga are currently developing their legal framework through Project funded technical assistance.</li> <li>Nauru, Niue, FSM and Kiribati are encouraged to use the ABS Regional Guidelines for development of ABS policies.</li> </ul>	S
Output: 3.1.2 Strategies and action plans for the implementation of ABS measures are	December 2020	70%	100%	Capacity stocktaking analysis has been completed for 14 countries including existence of national expertise, legal aspects, traditional knowledge, research institutions, governments, and private sector. <sup>&</sup>lt;sup>5</sup> As much as possible, describe in terms of immediate gains to target groups, e.g. access to project deliverables, participation in receiving services; gains in knowledge, etc.

developed or reviewed, as appropriate.				clos collaboration with ABS Initiative has been drafted and shared by the next quarter. Capacity-building sessions have been held for 3 countries (Samoa, Tonga & Tuvalu) through national workshop and for the Pacific region through webinars.		
Output: 3.1.3 Enabling environment is created, including: (i) capacity among stakeholders with particular emphasis in the Government agencies in charge of making the Protocol operational; (ii) supportive groundwork for countries to take advantage of bio discovery and commercialisation n opportunities under the Protocol; and (iii) supportive institutional framework developed for protecting traditional knowledge, innovations and practices and customary uses of	December 2019	90%	100%	There have been country specific capacity building sessions for PNG, Tonga, Tuvalu, Solomon Islands, and Samoa. These are the list of those countries that had requested during the reporting period. Otherwise, the Project has provided necessary capacity building support at national level since ethe inception. A capacity building assessment report, lessons learned and good practices / case studies is highlighted in the technical report that was launched during the TK dialogue Forum in May. The project has widened the range of stakeholders involved in building capacity, knowledge sharing and providing best practices or examples. A special regional conference on traditional knowledge was also held in Suva. Key technical agencies were given opportunity to make high level remarks and stakeholders were involved by way of dialogue. The outcomes of the conference feeds into Pacific voice negotiating at CBD Post 20202 global Biodiversity Framework.	HS	

biological and genetic resources					
Output 4.1.3 Information and experience exchange on development and implementation of the Nagoya Protocol takes place, especially mutual learning between Pacific countries.	December 2020	60%	100%	A regional conference on traditional knowledge gave opportunity for regional information exchange.	HS
Output 4.2.1 Technical support provided to the project, including monitoring, evaluation and all reporting including financial	December 2020	95%	100%	The project has met all reporting and monitoring requirements. The only last bit left is the terminal reporting which has already begun.	HS

#### 3.3. Risk Rating

Table A. Risk-log Insert ALL the risks identified either at CEO endorsement (inc. safeguards screening), previous/current PIRs, and MTRs. Use the last line to propose a suggested consolidated rating.

	Risk affecting:				Risk F	-			Variation respect to last rating		
Risk	Outcome / outputs	CEO ED	PIR 1	PIR 2	MTR	PIR 3		PIR 5 (this PIR)	Δ	Justification	
COVID-19	Outcomes 1-3	L	L	L	N/A	L	М	Μ	=	The project felt that if borders remain close and countries continued to enforce strict COVID protocols sch as social distancing then physical workshop would be impossible. This will also lead to unutilized funds.	

Post Ratificatión of NP	All outcomes & outputs	М	М	М	N/A	L	М	М	=	Countries not fully participating on the ABS Clearing House.
Consolidated project risk		n.a	М	М	N/A	L	L	L	=	This section focuses on the variation. The overall rating is discussed in section 2.3.

# Table B. Outstanding medium & high risksList here only risks from Table A above that have a risk rating of M or worse in the current PIR

	Actions decided during the	Actions effectively	Additional mitigation measures for the next periods			
Risk	previous reporting instance (PIRt-1, MTR, etc.)	undertaken this reporting period	What	When	By whom	
COVID-19	Project Planning to have a contingency plan in view of COVID 19 impacts and discuss at the Steering Committee Level	<ol> <li>Issue was discussed at the Project Steering Committee</li> <li>SPREP Project Planning (IOE) discussed the issue and developed a systmetic approach to ensure fund are fully utilised and there was a Plan B in case borders remained closed. Virtual Meeting and Hybrid workshops were seen as one of he strategies.</li> </ol>	Review dates, Budget and the mode of regional workshops and meetings every month incase there is no clear indication of when the borders wll open and travel is retsored in the larger Pacific island countries.	Every Month from January until June.	Rahul and James	
Post Ratification of NP	Raise the issue at a Pacific Meeting and also send important reminders to countries, provide capacity building support where needed.	<ol> <li>Capacity building sessions for countries were done during national ABS workshops</li> <li>Issue has been identified to be discussed during Pacific preparatory meeting for CBD COP.</li> </ol>	Countries Will be shared with online tolos, information and support for complaince.	July – Dec	Rahul

Add rows as needed to			
reflect additional risks			

High Risk (H): There is a probability of greater than 75% that assumptions may fail to hold or materialize, and/or the project may face high risks. Significant Risk (S): There is a probability of between 51% and 75% that assumptions may fail to hold and/or the project may face substantial risks. Medium Risk (M): There is a probability of between 26% and 50% that assumptions may fail to hold or materialize, and/or the project may face only modest risks. Low Risk (L): There is a probability of up to 25% that assumptions may fail to hold or materialize, and/or the project may face only modest risks.

#### **Project Minor Amendments**

Minor amendments are changes to the project design or implementation that do not have significant impact on the project objectives or scope, or an increase of the GEF project financing up to 5% as described in Annex 9 of the Project and Program Cycle Policy Guidelines.

Please tick each category for which a change occurred in the fiscal year of reporting and provide a description of the change that occurred in the textbox. You may attach supporting document as appropriate.

Minor	
amendments	The request for extension as noted by the Project Steering Committee was made in view of the fact that an additional six months will provide
	sufficient time to compensate for the loss of time encountered due to COVID-19 impacts. The situation was projected to normalize in the
	Pacific with vaccination numbers increasing, COVID safe measures becoming prominent, and a travel bubble within the region being discussed
	and SPREP will be able to conduct business by physically attending some of the most prioritized issues in the region. given significant delays
	and challenges, there remains an essential unspent budget. The ABS Project Team was vigilant not to spend money or revise the budget without
	prior approval or consent by the Steering Committee. This included project savings accrued because of collaboration with other donors,
	termination of some activities due to its relevance, unspent budgetary allocations on activities that couldn't happen, such as physical
	workshops and travel.

#### **GEO Location Information:**

The Location Name, Latitude and Longitude are required fields insofar as an Agency chooses to enter a project location under the set format. The Geo Name ID is required in instances where the location is not exact, such as in the case of a city, as opposed to the exact site of a physical infrastructure. The Location & Activity Description fields are optional. Project longitude and latitude must follow the Decimal Degrees WGS84 format and Agencies are encouraged to use at least four decimal points for greater accuracy. Users may add as many locations as appropriate. Web mapping applications such as <u>OpenStreetMap</u> or <u>GeoNames</u> use this format. Consider using a conversion tool as needed, such as: <u>https://coordinates-converter.com</u> Please see the Geocoding User Guide by clicking <u>here</u>

Location Name Required field	Latitude Required field	Longitude Required field	Geo Name ID Required field <u>if</u> the location is not an exact site	Location Description Optional text field	Activity Description Optional text field
Apia, Samoa	-13.83333	-171.76666	4035413	Samoa is based in the Pacific Region. The project is being housed at SPREP, a regional environmental organisation in Apia. The project is being implemented in 14 Pacific Island countries.	The project supports ratification of Nagoya Protocol, capacity building, development of compliance measures and general awareness raising on access and benefit sharing in th Pacific.
