Implementation Status and Key Decisions

Additional Financing totaling USD17.31 million (including USD14.95 million from the International Development Association, AUD3 million from Australia and USD 0.4 million contribution from the Government of Tonga) became effective in October 2018. Progress has been made towards strengthening early warning, with the AM transmitter tower now completed and commissioned, and the System Integrator Consulting firm now engaged and supporting key technical agencies with the implementation of early warning strengthening activities. The Design and Supervision (D&S) Firm has been engaged to undertake design and supervision for school repair, retrofitting and reconstruction and construction is expected to

commence in coming months. The Mid Term Review of the Project, conducted in March 2019 found that the overall efficiency of the project to date was assessed as Modest to Poor, but it was found that this could be improved by ongoing commitment by all stakeholders to improve implementation progress.

| Comments: | Comments: With the AM Transmitter now complete, this is a significant milestone towards putting the infrastructure in place to ensure that timely hazard forecast and warning messages can be disseminated to the public. With the additional strengthening of Early Warning Systems under Component 1 - the next step will be developing clearer/improved warning messages, and training the public on how to understand and act on them. | | | | | | | |

| Comments: | The CERC was triggered in March 2018. It was the first CERC to be triggered in the Pacific Region, and the fourth to be triggered globally. Indication of the government's intention to trigger the CERC came to the Bank within one month of the event. The formal request to trigger the CERC, including the full CERC trigger package was received and approved within six weeks. | | | | | | | | |
