

June 14th, 2022

Mr. Carlos Manuel Rodríguez
Chief Executive Officer and Chairperson- Global Environment Facility
Global Environment Facility Secretariat
1818 H Street, NW, Mall Stop P4-400
Washington, DC, 20433 USA

Dear Mr. Rodríguez,

This letter confirms that the Sustainable Cities Integrated Approach Pilot's child project Support to the National Platform for Sustainable Cities and Climate Change in Peru: Lima Metropolitan Area Pilot (GEF ID 9077, IDB Technical Cooperation PE-T1355) will complement the World Bank (WB) Loan PE-9040 (US\$ 93,000,000) for the Lima Metropolitan BRT North Extension (P170595) approved by the Board on January 30, 2020, and with a closing date on January 31, 2023.

After reviewing relevant information and follow up discussions among the teams we have concluded that the GEF project is consistent with the objectives of the Lima Metropolitan BRT North Extension (P170595) project financed by the World Bank. Based on these common objectives and complementarity of activities, we believe there is a solid ground for cooperation.

Therefore, we recommend the GEF project can be considered and for co-financing of the WB Loan PE-9040.

Yours sincerely,

Felipe Targa
Urban Transport Senior Specialist
Task Team Leader Lima Metropolitan BRT North Extension (P170595) project

cc: Angela Armstrong, World Bank GEF Program Manager.

Sebastián Lew, Sector Specialist, Housing and Urban Development, Interamerican Development Bank.
