6 December 2018

Chairman
Sustainable & Renewable Energy Development Authority (SREDA)
Power Division, MoPEMR
Dhaka

Subject: Partnership and cooperation with “Promoting Low Carbon Urban Development in Bangladesh” Project of SREDA.

Dear Sir,

This has reference to the stakeholder consultation meeting held on 26th September 2018 at SREDA with regard to the UNDP-GEF supported project on "Promoting Low Carbon Urban Development (LCUD) in Bangladesh".

In view of our commitment in promoting sustainable and renewable energy & energy efficiency measures, our organization confirms its non-binding commitment to the above mentioned UNDP-GEF project proposal. Till now, we have approved facility amounting BDT 540 crore (USD 65 million) only under 20 solar roof-top and energy efficiency projects. We would be happy to partner with SREDA to undertake necessary preparatory activities toward implementation of renewable energy & energy efficiency programs in urban areas (e.g. LCUD) in Bangladesh. These activities may include the following:

1. Design workshops with private sector
2. Technical assistance in developing similar projects
3. Developing design guidelines and tools for the design of energy-efficient residential buildings
4. Production and dissemination of knowledge products
5. Plan of financing projects in the similar scopes.

We look forward to working together for sustainable development of renewable energy and energy efficiency sector in Bangladesh.

Yours sincerely,

Mahmood Malik
Executive Director & CEO
