- (b) For FSPs up to USD 3 million, the limit is up to \$100,000;
- (c) For FSPs up to USD 6 million, the limit is up to USD 150,000;
- (d) For FSPs up to USD 10 million, the limit is up to USD 200,000; and
- (e) For FSPs above USD 10 million, the limit is up to USD 300,000.

Please provide justification

After consultation with Governmental counterparts, FAO is willing to request, on an exceptional basis, an increase of the PPG amount due to the following reasons: - The project financing amount is very close to the \$6M mark to access \$200K for the PPG (Only \$7.5 k difference to reach the \$6M threshold) - The review process has identified a number of baseline data and information gaps. The additional \$50k will be instrumental for ensuring that the quality of analysis of key project information such as gender, biodiversity, social issues, water footprint, and others are appropriately taken into consideration. - Most of the baseline information and primary data for this project will have to be generated through PPG financing. - COVID is bringing an additional layer of uncertainty in project preparation and in the Agency's experience from the last 4 months, a small buffer for contingencies and for timely sensitive adaptive management in the field is being crucial for quality design in the current context.
