A. Focal Area Strategy Framework and Program

Objectives/Programs	Focal Area Outcomes	Trust Fund	GEF Amount(\$)	Co-Fin Amount(\$)
CW-2_P3	Outcome 3.1.: Quantifiable and verifiable tonnes of POPs eliminated or reduced.	GET	8,256,881	60,300,000
		Total Project	ct Cost(\$) 8,256,881	60,300,000

B. Project description summary

Project Objective

Zambia: To reduce exposure to uPOPs pollution in pilot sites and strengthen the institutional capacity to manage and regulate e-waste. Overall PDO: To reduce exposure to mercury and uPOPs pollution in pilot sites and strengthen the institutional capacity to manage and regulate mercury use in artisanal small-scale gold mining (ASGM) and e-waste in selected countries in Africa.

Project	Component	Expected	Expected Outputs	Trust	GEF Project Financing(\$)	Confirmed Co-Financing(\$)
Component	Type	Outcomes		Fund		

Project Component	Component Type	Expected Outcomes	Expected Outputs	Trust Fund	GEF Project Financing(\$)	Confirmed Co-Financing(\$)
Component 1: Institutional strengthening, knowledge and capacity building	Technical Assistance	Improved and regular environmental monitoring of POPs and inspections	Guidelines and monitoring protocols developed. Support to awareness on sound management of waste and its impact on human health and the environmentMonitoring protocols developed (training materials developed) Training delivered on: 1. new/amended legislation, regulations, and bylaws on waste management	GET	1,800,000	15,964,686
			2. BAT/BEP for national and municipal waste management (generation, collection, transportation, sorting, treatment, recycling, and disposal)			
			Stakeholder Mapping finalized (including private and informal sectors)			
			Partnerships with private sector for improved recovery and recycling developed			
			Participation in regional platform events			

Project Component	Component Type	Expected Outcomes	Expected Outputs	Trust Fund	GEF Project Financing(\$)	Confirmed Co-Financing(\$)
Component 2: Support for policy dialogue and regulatory enhancements	Technical Assistance	Policy framework for management of harmful chemicals related to POPs	A national strategy and implementation plan for promoting the reduction of emissions and releases of, and exposure to, POPs and priority chemicals developed	GET	1,800,000	12,500,450
			A methodology for screening and evaluating health and environment risks associated with POPs releases and other hazardous chemicals developed			
			Comprehensive assessment of the national and municipal institutional and technical framework for waste management (generation, collection, transportation, sorting, treatment, recycling, and disposal)			
			Training for health-care workers and awareness-raising through health facilities			
			National Steering Committee established and a communication strategy in place			

Project Component	Component Type	Expected Outcomes	Expected Outputs	Trust Fund	GEF Project Financing(\$)	Confirmed Co-Financing(\$)
Component 3: Demonstrating application of technological tools and economic approaches	Investment	Reduced environmental health risks from POPs releases in urban waste in Kabwe municipality Improved management of waste collection and transportation Improved treatment of POPs and hazardous waste; Improved recycling of wastes	An economic viability and waste value chain study conducted. Hazardous waste management is piloted at existing landfill sites (investment in infrastructure). Upgrading an operational landfill to a recycling facility Trainings donducted for ragpickers on occupational health and safety	GET	4,263,696	30,334,864
Ducia et Managama	ant Coat (DMC)		Sub T	otal (\$)	7,863,696	58,800,000

G. Projects' Target Contributions to Global Environmental Benefits

Corporate Results	Replenishment Targets	PIF Project Targets	Project Targets
1.Maintain globally significant biodiversity and the ecosystem goods and services that it provides to society	Improved management of landscapes and seascapes covering 300 million hectare		
2.Sustainable land management in production systems (agriculture, rangelands, and forest landscapes)	120 million hectares under sustainable land management		
3. Promotion of collective management of transboundary water systems and implementation of the full range of policy, legal, and institutional reforms and	Water-food-ecosystems security and conjunctive management of surface and groundwater in at least 10 freshwater basin		
investments contributing to sustainable use and maintenance of ecosystem services	20% of globally over-exploited fisheries(by volume) moved to more sustainable levels		
4. Support to transformational shifts towards a low-emission and resilient development path	750 millions of CO2e mitigated (include both direct and indirect)		
5. Increase in phase-out, disposal and reduction of releases of POPs, ODS, mercury and other chemicals of global concern	Disposal of 80,000 tons of POPs (PCBs, obsolete pesticides)		
	Reduction of 1000 tons of Mercury		
	Phase-out of 303.44 tons of ODP (HCFC)		

Corporate Results	Replenishment Targets	PIF Project Targets	Project Targets	
6. Enhance capacity of countries to implement MEAs (multilateral Environmental agreements)	Development and sectoral planning frameworks integrate measurable targets		1.0	
and mainstream into national and sub-national policy, planning financial and legal	drawn from the MEA in atleast 10 countries		1.0	
frameworks	Functional environmental information systems are established to support decision-making in atleast 10 countries			

Core Indicators

Indicator 9 Reduction, disposal/destruction, phase out, elimination and avoidance of chemicals of global concern and their waste in the environment and in processes, materials and products (metric tons of toxic chemicals reduced)

Metric Tons (Expected at PIF)	Metric Tons (Expected	at CEO Endorsement)	Metric Tons (A	Achieved at MTR)	Metric	Tons (Achieved at TE)

Provide additional explanation on targets, other methodologies used, and other focal area specifics (i.e., Aichi targets in BD) including justification where core indicator targets are not provided

Note for Core Indicator 9: Reports on mercury reduction (in Metric tons) as approved under the GEF-6 focal area objective. The program does not involve disposal of PCBs or obsolete pesticides and so the indicator of tons of POPs disposed of in Table E cannot be applied directly Note for Core Indicator10: As approved in the PFD, the Program directly contributes to GEF-6 Corporate Result #5 Increase in phase-out, disposal and reduction of releases of POPs, ODS, mercury and other chemicals of global concern. In line with GEF-6 Programming Directions for Chemicals and Waste and with Stockholm convention obligations, global environmental benefits as relates to POPs will accrue in particular from release reduction of unintentionally produced POPs, preliminary estimated at 12gTEQ/year using the UNEP toolkit taking into account replication, as well

as release reduction of brominated flame retardants. The program does not involve disposal of PCBs or obsolete pesticides and the indicator of tons of POPs disposed of in Table E of GEF Data sheet (aligned with GEF-7 priorities) cannot be applied directly.							

PART II: Project JUSTIFICATION

Child Project?

If this is a child project under a program, describe how the components contribute to the overall program impact.

This is a child project under the overall program and has been developed within the context of implementing a regional approach to improve the management and reduce exposure to mercury and UPOPs. As designed the components of the Zambia child project contribute towards towards strengthening of institutional capacities to manage and regulate hazardous wastes in Zambia to help address the goal of addressing pollution management and environment health issues at the national and regional levels. The PID provides individual country level annexes detailing the component contributions and activities which are aligned with the PFD.

Stakeholders

Please provide the Stakeholder Engagement Plan or equivalent assessment.

Please see the detailed Stakeholder Engagement Plan (SEP) included in the package. Stakeholders engagement is a key element of the project and key stakeholders are identified in the SEP.

The project's <u>primary audience</u> includes the Governments entities in particular the Ministries of Environment, Industries, Mines, Chemicals, ICT and Health as relevant, their regulatory enforcement agencies, and municipalities. They will benefit from the enhancement of policies, and development of guidelines and monitoring systems for the management of mercury and hazardous chemical waste, including e-waste.

The project's <u>secondary audience</u> will be industries, industry associations, NGOs, including CBOs, local organizations and communities affected by harmful chemicals and wastes. They will be actively involved in the design and implementation of country projects

Documents

Title Submitted

In addition, provide a summary on how stakeholders will be consulted in project execution, the means and timing of engagement, how information will be disseminated,

and an explanation of any resource requirements throughout the project/program cycle to ensure proper and meaningful stakeholder engagement.

1. In general, the project will work closely with community-based organizations, private sectors, NGOs and local communities as relevant, who are invested in pollution management

issues, including opportunities for income generation and green job opportunities. This engagement will go beyond consultation to actively involve communities in the design and

implementation of child projects and in the learning across the Program. Special attention will be given to ensure the participation of indigenous people and local communities at the site

level if applicable. It has been obvious that indigenous and local communities play a crucial role in environmental governance as traditional knowledge and practices can be used to manage

and preserve natural areas as well as restore polluted or contaminated areas.

Also, being part of the overall program, the regional coordination project will establish the coordination framework for the Program and will enable a sustained communication with and

among Program stakeholders through stakeholder consultations at the national and regional levels to support all components

Stakeholders Engagement and Information Disclosure: A wide range of stakeholders have been consulted and their roles and responsibilities have been clearly defined in the SEP.

Stakeholders will be actively involved in decision making and project implementation processes through established project implementation framework. A Communication Strategy

will be prepared to keep stakeholders informed on the project progress. This will ensure appropriate project information on environmental and social risks and impacts is disclosed to

stakeholders in a timely, understandable, accessible and appropriate manner format.

Select what role civil society will play in the project:

Consulted only; Yes

Member of Advisory Body; Contractor;

Co-financier;

Member of project steering committee or equivalent decision-making body;

Executor or co-executor;

Other (Please explain) Yes

Engaged, Consulted and Trained.

Gender Equality and Women's Empowerment

Provide the gender analysis or equivalent socio-economic assessment.

The SEP and Environment and Social Management Framework (ESMF) capture the gender considerations for the project and are attached to the package. As the specific sites are confirmed during the first year, site specific gender analysis as part of the socio economic assessment will be conducted.

Documents

Title Submitted

Does the project expect to include any gender-responsive measures to address gender gaps or promote gender equality and women empowerment?

Yes

If yes, please upload document or equivalent here

The project as designed will provide opportunities for women to increase benefits and minimize health risks. As mentioned, it will undertake site specific gender analysis as part of the socio-economic assessment (once the site selection is confirmed); will highlight best practices in integrating gender aspects in "empowerment" activities; and will help improve their livelihoods and scope of decision making. Specifically, under component 2, gender considerations will be integrated as part of the policy dialogue to build women's capacity to actively participate and have a voice in key decision-making, while providing dialogue platforms that are inclusive and action-oriented. Under components 1 and 3, the project will address various gender gaps in access to information (e.g. on safety measures, adoption to cleaner technology, availability of training and other public programs) and opportunities for decent work terms and conditions.

Women have the potential to play an important role in behavioral change that could significantly reduce exposure of children to hazardous environment, and can therefore play an important role in changing health seeking behavior, including mitigation of health impacts due to lead poisoning. Thus, the project has a strong emphasis on inclusion of women in the sensitization and communication campaign, participation in the health interventions that target affected children, and local level nutritional support, livelihood support activities. In addition, the project will build upon selected municipalities that have already implemented a number of initiatives targeting groups such as women headed households, the elderly, the disabled and youth. The project will provide special attention to these groups with dedicated grant opportunities under subcomponent 3.2 and targeted sensitization and education campaigns.

If possible, indicate in which results area(s) the project is expected to contribute to gender equality:

Closing gender gaps in access to and control over natural resources;

Improving women's participation and decision making Yes

Generating socio-economic benefits or services or women Yes

Does the project's results framework or logical framework include gender-sensitive indicators?

No

While the project does not include a specific indicator for gender action, several activities as relevant will measure success and report results disaggregated by gender.

PART III: Certification by GEF partner agency(ies)

A. GEF Agency(ies) certification

GEF Agency Coordinator	Date	Project Contact Person	Telephone	Email
Shaanti Kapila	4/16/2020	Gayatri Kanungo	2024587870	skapila@worldbank.org

ANNEX A: STATUS OF IMPLEMENTATION OF PROJECT PREPARATION ACTIVITIES AND THE USE OF FUNDS.

A. Provide detailed funding amount of the PPG activities financing status in the table below:

N/A

ANNEX B: CALENDAR OF EXPECTED REFLOWS (if non-grant instrument is used)

Provide a calendar of expected reflows to the GEF/LDCF/SCCF/CBIT Trust Funds or to your Agency (and/or revolving fund that will be set up)

N/A

ANNEX C: GEF 7 Core Indicator Worksheet

Use this Worksheet to compute those indicator values as required in Part I, Table G to the extent applicable to your proposed project. Progress in programming against these targets for the program will be aggregated and reported at any time during the replenishment period. There is no need to complete this table for climate adaptation projects financed solely through LDCF and SCCF.

GEF 7 Core Indicators Worksheet is attached in the GEF portal

ANNEX: Project Taxonomy Worksheet

Use this Worksheet to list down the taxonomic information required under Part1 by ticking the most relevant keywords/topics//themes that best describes the project

Project Taxonomy Worksheet is attached in the GEF portal

Submitted to GEF Secretariat Review
