B. Project description summary

Project Objective

To promote and support innovative and scalable initiatives, and foster multistakeholder partnerships at the local level to tackle global environmental issues in priority landscapes and seascapes

Project Component	Financing Type	Expected Outcomes	Expected Outputs	Trust Fund	GEF Project Financing(\$)	Confirmed Co-Financing(\$)
Community-based conservation of threatened ecosystems and species	Technical Assistance	Community-based models and approaches promoted for conservation and sustainable use of threatened ecosystems and species in priority landscapes and seascapes	<p>Community-led biodiversity friendly practices and approaches in agriculture, forestry, fisheries, including improved management measures and strengthened governance of Indigenous Community-conserved areas (ICCAs) promoted covering at least 1.2 million ha of landscapes/seascapes</p> <p>At least two community-based protected area/conserved area designations and/or networks strengthened in each country</p> <p>Community-led actions to enhance protection of threatened species including enhancing transboundary conservation</p>	GET	20,957,041	21,880,000

Project Component	Financing Type	Expected Outcomes	Expected Outputs	Trust Fund	GEF Project Financing(\$)	Confirmed Co-Financing(\$)
Sustainable agriculture and fisheries, and food security	Technical Assistance	Community-based climate resilient agriculture, sustainable land management, fisheries and food practices in production landscapes and seascapes that improve productivity and improve supply chain tested and scaled up	<p data-bbox="775 339 1149 675">At least 240,000 ha of production landscapes and seascapes management, including restored degraded areas, applying climate-smart agriculture, sustainable land management, fisheries and food practices for improved productivity, food security, and livelihoods of smallholder farmers and supports achievement of national LDN targets.</p> <p data-bbox="775 754 1149 994">A suite of integrated management practices, including community innovation and traditional knowledge related to natural resource management, are promoted in agriculture, rangeland, and fisheries and improves food security.</p> <p data-bbox="775 1074 1149 1313">Viable linkages and partnerships between communities and private sector (esp. SMEs) established in at least 50 countries for sustainable and improved food production practices (such as diversification and sustainable intensification) and supply chain management</p>	GET	10,234,834	10,685,000

Project Component	Financing Type	Expected Outcomes	Expected Outputs	Trust Fund	GEF Project Financing(\$)	Confirmed Co-Financing(\$)
Low-carbon energy access co-benefits	Technical Assistance	<div style="border: 1px solid black; padding: 5px;"> <p>Low carbon, viable and appropriate technologies and approaches demonstrated and scaled up in partnership with private sector and government that improves community energy access, in line with larger frameworks such as SDGs and NDCs</p> </div>	<p>Increased total installed renewable energy capacity (at least 150 KW) from innovative and appropriate technologies</p> <p>At least 25 bottom-up, low-cost appropriate innovative low carbon energy solutions demonstrated and deployed leading to multiple benefits including:</p> <ul style="list-style-type: none"> - at least 7,500 ha of forest and non-forest lands restored and enhanced carbon stocks - at least 7,500 households achieving energy access 	GET	10,234,834	10,685,000

Project Component	Financing Type	Expected Outcomes	Expected Outputs	Trust Fund	GEF Project Financing(\$)	Confirmed Co-Financing(\$)
Local to global coalitions for chemicals and waste management	Technical Assistance	Innovative community-based tools and approaches demonstrated, deployed and transferred, with support from sound chemicals and waste management platforms.	<p>At least 150 tons of POP and mercury contained materials and products removed/disposed in an environmentally friendly way</p> <p>At least 2 local to global coalitions and networks strengthened</p> <p>Awareness and outreach strategy for sound chemicals, waste management and mercury implemented in at least 25 SGP countries.</p>	GET	5,848,477	6,106,000

Project Component	Financing Type	Expected Outcomes	Expected Outputs	Trust Fund	GEF Project Financing(\$)	Confirmed Co-Financing(\$)
Catalyzing sustainable urban solutions	Technical Assistance	Appropriate integrated community-oriented sustainable urban solutions promoted in partnership with private sector and government	<p data-bbox="770 339 1137 523">Improved capacities to promote community-driven, socially inclusive and integrated solutions to address low-emission and resilient urban development in at least 10 countries</p> <p data-bbox="770 595 1128 810">At least 10 innovative socially-inclusive urban solutions/ approaches (including waste and chemical management, energy, transport, watershed protection, ecosystem services and biodiversity) demonstrated</p> <p data-bbox="770 882 1160 1034">Viable public-private partnership approach for low carbon energy access for marginalized urban communities is implemented (no of countries to be determined)</p>	GET	1,462,119	1,526,000

Project Component	Financing Type	Expected Outcomes	Expected Outputs	Trust Fund	GEF Project Financing(\$)	Confirmed Co-Financing(\$)
CSO-Government-Private Sector Policy and Planning Dialogue Platforms	Technical Assistance	Community voices and participation are promoted and enhanced in global and national policy, strategy development related to global environment and sustainable development issues	<p data-bbox="775 339 1149 611">At least 25 national level targeted CSO-government-private sector dialogues convened to support and bring community voices into policy, strategy, and planning development in relation to key multilateral environmental agreements and sustainable development goals.</p> <p data-bbox="775 691 1149 866">At least 4 global level CSO-government-private sector and other stakeholder dialogue facilitated informing global policy discourse on key global environment issues</p> <p data-bbox="775 946 1133 1121">At least 10 CSO-government private sector/business forum facilitated in SGP countries to mobilize and promote public-private partnership on key global environmental issues</p>	GET	1,457,551	1,522,000

Project Component	Financing Type	Expected Outcomes	Expected Outputs	Trust Fund	GEF Project Financing(\$)	Confirmed Co-Financing(\$)
Promoting social inclusion	Technical Assistance	Social inclusion, particularly empowerment of women, indigenous peoples, youth and people with disabilities, is mainstreamed and enhanced in SGP initiatives on environment and livelihood improvement	<p>At least 30% of SGP projects are led by women and/or institute concrete mechanisms for increased participation of women in decision-making</p> <p>Women and girls constitute more than 50% of beneficiaries of all SGP projects</p> <p>At least 20% of relevant SGP country programs globally include targeted support for Indigenous Peoples.</p> <p>At least 35% of SGP country programs demonstrate appropriate models of engaging youth and persons with disabilities.</p> <p>Guidelines and best practices generated from SGP projects on engagement with women, indigenous peoples, youth and persons with disabilities are widely shared</p>	GET	2,274,641	2,375,000

Project Component	Financing Type	Expected Outcomes	Expected Outputs	Trust Fund	GEF Project Financing(\$)	Confirmed Co-Financing(\$)
Monitoring & evaluation and Knowledge management	Technical Assistance	<p>A common, robust M&E strategy is developed and implemented in all countries at all levels (project, country and global)</p> <p>Networking and knowledge sharing leverage local actions for global change to safeguard global environment</p>	<p>Project implementation is monitored, issues and challenges identified and documented, and lessons learnt shared widely and systematically integrated into design of new projects with active participation of CSOs and local communities.</p> <p>Updated SGP database developed and maintained for effective collection, archive and management of M&E data and information/knowledge sharing.</p> <p>Citizen-based knowledge platform (digital library of community innovations) maintained and actively utilized by SGP stakeholders</p> <p>Global and regional knowledge transfer and replication of appropriate technology, tool, and approach on global environmental issues through at least 30-40 south-south community innovation exchanges</p>	GET	3,474,559	3,627,000

Project Component	Financing Type	Expected Outcomes	Expected Outputs	Trust Fund	GEF Project Financing(\$)	Confirmed Co-Financing(\$)
				Sub Total (\$)	55,944,056	58,406,000

Please provide justification

PMC is agreed at 10% for SGP

C. Sources of Co-financing for the Project by name and by type

Sources of Co-financing	Name of Co-financier	Type of Co-financing	Investment Mobilized	Amount(\$)
GEF Agency	UNDP	Grant	Investment mobilized	4,000,000
Government	Multiple	In-kind	Investment mobilized	11,000,000
CSO	Multiple	In-kind	Recurrent expenditures	20,000,000
Private Sector	Multiple	In-kind	Recurrent expenditures	1,500,000
Private Sector	Multiple	Grant	Investment mobilized	1,500,000
Beneficiaries	Various	In-kind	Recurrent expenditures	26,000,000
			Total Co-Financing(\$)	64,000,000

Describe how any "Investment Mobilized" was identified

Over the past months, the SGP CPMPT assisted UNDP to organize strategic discussions with many key donors and potential SGP partners including multilateral and bilateral donors, programme country governments, CSOs and CBOs and the private sector to identify potential for collaboration and co-financing opportunities. Several co-financing investments have been mobilized as a result. These include the Adaptation Fund, the MAVA foundation, the Caribbean Biodiversity Fund, the SOS-Sahel Programme and several local level CSOs and CBOs in programme countries.

D. Trust Fund Resources Requested by Agency(ies), Country(ies), Focal Area and the Programming of Funds

Agency	Trust Fund	Country	Focal Area	Programming of Funds	Amount(\$)	Fee(\$)
UNDP	GET	Global	Multi Focal Area	Small Grant Program	61,538,462	2,461,538

---------------------------------	---	---------------------------------	--------------------------------

--	--	--	--

Type/name of the third-party certification

Indicator 5.2 Number of Large Marine Ecosystems (LMEs) with reduced pollutions and hypoxia

Number (Expected at PIF)	Number (Expected at CEO Endorsement)	Number (achieved at MTR)	Number (achieved at TE)
0	0	0	0

LME at PIF LME at CEO Endorsement LME at MTR LME at TE

Indicator 5.3 Amount of Marine Litter Avoided

Metric Tons (expected at PIF)	Metric Tons (expected at CEO Endorsement)	Metric Tons (Achieved at MTR)	Metric Tons (Achieved at TE)

Indicator 6 Greenhouse Gas Emissions Mitigated

Total Target Benefit	(At PIF)	(At CEO Endorsement)	(Achieved at MTR)	(Achieved at TE)
Expected metric tons of CO ₂ e (direct)	0	0	0	0
Expected metric tons of CO ₂ e (indirect)	0	0	0	0

Indicator 6.1 Carbon Sequestered or Emissions Avoided in the AFOLU (Agriculture, Forestry and Other Land Use) sector

Total Target Benefit	(At PIF)	(At CEO Endorsement)	(Achieved at MTR)	(Achieved at TE)
Expected metric tons of CO ₂ e (direct)				
Expected metric tons of CO ₂ e (indirect)				
Anticipated start year of accounting				
Duration of accounting				

Indicator 6.2 Emissions Avoided Outside AFOLU (Agriculture, Forestry and Other Land Use) Sector

Total Target Benefit	(At PIF)	(At CEO Endorsement)	(Achieved at MTR)	(Achieved at TE)
Expected metric tons of CO ₂ e (direct)				

Total Target Benefit	(At PIF)	(At CEO Endorsement)	(Achieved at MTR)	(Achieved at TE)
Expected metric tons of CO ₂ e (indirect)				
Anticipated start year of accounting				
Duration of accounting				

Indicator 6.3 Energy Saved (Use this sub-indicator in addition to the sub-indicator 6.2 if applicable)

Total Target Benefit	Energy (MJ) (At PIF)	Energy (MJ) (At CEO Endorsement)	Energy (MJ) (Achieved at MTR)	Energy (MJ) (Achieved at TE)
Target Energy Saved (MJ)				

Indicator 6.4 Increase in Installed Renewable Energy Capacity per Technology (Use this sub-indicator in addition to the sub-indicator 6.2 if applicable)

Technology	Capacity (MW) (Expected at PIF)	Capacity (MW) (Expected at CEO Endorsement)	Capacity (MW) (Achieved at MTR)	Capacity (MW) (Achieved at TE)
------------	---------------------------------	---	---------------------------------	--------------------------------

Indicator 7 Number of shared water ecosystems (fresh or marine) under new or improved cooperative management

Shared water Ecosystem	Count	Number (Expected at PIF)	Number (Expected at CEO Endorsement)	Number (Achieved at MTR)	Number (Achieved at TE)
------------------------	-------	--------------------------	--------------------------------------	--------------------------	-------------------------

Indicator 7.1 Level of Transboundary Diagnostic Analysis and Strategic Action Program (TDA/SAP) formulation and implementation (scale of 1 to 4; see Guidance)

Shared Water Ecosystem	Rating (Expected at PIF)	Rating (Expected at CEO Endorsement)	Rating (Achieved at MTR)	Rating (Achieved at TE)
------------------------	--------------------------	--------------------------------------	--------------------------	-------------------------

Indicator 7.2 Level of Regional Legal Agreements and Regional management institution(s) (RMI) to support its implementation (scale of 1 to 4; see Guidance)

Shared Water Ecosystem	Rating (Expected at PIF)	Rating (Expected at CEO Endorsement)	Rating (Achieved at MTR)	Rating (Achieved at TE)
------------------------	--------------------------	--------------------------------------	--------------------------	-------------------------

Indicator 7.3 Level of National/Local reforms and active participation of Inter-Ministerial Committees (IMC; scale 1 to 4; See Guidance)

Shared Water Ecosystem	Rating (Expected at PIF)	Rating (Expected at CEO Endorsement)	Rating (Achieved at MTR)	Rating (Achieved at TE)
------------------------	--------------------------	--------------------------------------	--------------------------	-------------------------

Indicator 7.4 Level of engagement in IWLEARN through participation and delivery of key products(scale 1 to 4; see Guidance)

Shared Water Ecosystem	Rating (Expected at PIF)	Rating (Expected at CEO Endorsement)	Rating (Achieved at MTR)	Rating (Achieved at TE)
------------------------	--------------------------	--------------------------------------	--------------------------	-------------------------

Indicator 8 Globally over-exploited fisheries moved to more sustainable levels

Metric Tons (Expected at PIF) Metric Tons (Expected at CEO Endorsement) Metric Tons (Achieved at MTR) Metric Tons (Achieved at TE)

Fishery Details

Indicator 9 Reduction, disposal/destruction, phase out, elimination and avoidance of chemicals of global concern and their waste in the environment and in processes, materials and products (metric tons of toxic chemicals reduced)

Metric Tons (Expected at PIF) Metric Tons (Expected at CEO Endorsement) Metric Tons (Achieved at MTR) Metric Tons (Achieved at TE)

Indicator 9.1 Solid and liquid Persistent Organic Pollutants (POPs) removed or disposed (POPs type)

POPs type Metric Tons (Expected at PIF) Metric Tons (Expected at CEO Endorsement) Metric Tons (Achieved at MTR) Metric Tons (Achieved at TE)

Indicator 9.2 Quantity of mercury reduced (metric tons)

Metric Tons (Expected at PIF) Metric Tons (Expected at CEO Endorsement) Metric Tons (Achieved at MTR) Metric Tons (Achieved at TE)

Indicator 9.3 Hydrochlorofluorocarbons (HCFC) Reduced/Phased out (metric tons)

Metric Tons (Expected at PIF) Metric Tons (Expected at CEO Endorsement) Metric Tons (Achieved at MTR) Metric Tons (Achieved at TE)

Indicator 9.4 Number of countries with legislation and policy implemented to control chemicals and waste (Use this sub-indicator in addition to one of the sub-indicators 9.1, 9.2 and 9.3 if applicable)

Number (Expected at PIF) Number (Expected at CEO Endorsement) Number (Achieved at MTR) Number (Achieved at TE)

Indicator 9.5 Number of low-chemical/non-chemical systems implemented, particularly in food production, manufacturing and cities (Use this sub-indicator in addition to one of the sub-indicators 9.1, 9.2 and 9.3 if applicable)

Number (Expected at PIF) Number (Expected at CEO Endorsement) Number (Achieved at MTR) Number (Achieved at TE)

Indicator 9.6 Quantity of POPs/Mercury containing materials and products directly avoided

Metric Tons (Expected at PIF)	Metric Tons (Expected at CEO Endorsement)	Metric Tons (Achieved at MTR)	Metric Tons (Achieved at TE)
--------------------------------------	--	--------------------------------------	-------------------------------------

--	--	--	--

Indicator 10 Reduction, avoidance of emissions of POP to air from point and non-point sources (grams of toxic equivalent gTEQ)

Grams of toxic equivalent gTEQ (Expected at PIF)	Grams of toxic equivalent gTEQ (Expected at CEO Endorsement)	Grams of toxic equivalent gTEQ (Achieved at MTR)	Grams of toxic equivalent gTEQ (Achieved at TE)
---	---	---	--

--	--	--	--

Indicator 10.1 Number of countries with legislation and policy implemented to control emissions of POPs to air (Use this sub-indicator in addition to Core Indicator 10 if applicable)

Number (Expected at PIF)	Number (Expected at CEO Endorsement)	Number (Achieved at MTR)	Number (Achieved at TE)
---------------------------------	---	---------------------------------	--------------------------------

--	--	--	--

Indicator 10.2 Number of emission control technologies/practices implemented (Use this sub-indicator in addition to Core Indicator 10 if applicable)

Number (Expected at PIF)	Number (Expected at CEO Endorsement)	Number (Achieved at MTR)	Number (Achieved at TE)
---------------------------------	---	---------------------------------	--------------------------------

--	--	--	--

Indicator 11 Number of direct beneficiaries disaggregated by gender as co-benefit of GEF investment

Number (Expected at PIF)	Number (Expected at CEO Endorsement)	Number (Achieved at MTR)	Number (Achieved at TE)

Part II. Project Justification

1a. Project Description

There are no significant changes in alignment with the project design with the original PIF.

SGP is a corporate programme of the GEF and a funding modality for CSOs to access GEF resources, implemented by UNDP. As such, SGP receives an earmarked GEF resource allocation negotiated at the time of the overall GEF replenishment. For the purpose to allocate resources, the current project constitutes the first tranche for half of the resources from the overall US\$ 128 million earmarked for SGP and therefore, another project (as second tranche) will be submitted to receive the remaining SGP core resources. Similarly, SGP will submit other projects to receive the STAR endorsed by countries to the SGP.

The SGP approach and results including the Outcomes and Outputs have been slightly modified and strengthened to improve the design of the project. These are further detailed in **Section A.1. 3 and the UNDP Project Document** that accompanies this document.

1) Global environmental problems, threats, root causes and barriers to be addressed.

There are no significant changes from the PIF, but since the time of the PIF approval, the threats, impacts, barriers presented in the original PIF have been further refined and elaborated through consultations. Please refer to **Section I – Development challenge (i) Global Environmental Problems and Root Causes** in the UNDP Project Document for details.

2) Baseline scenario or any associated baseline projects

There are no significant changes from the PIF. However, **Section II – Strategy, Part (iii)** and **Section III Results and Partnerships, Parts (ii) Partnerships and (iv) Stakeholder engagement of the UNDP Project Document** provide greater detail on the partners engagement strategy that the SGP will employ in the implementation of the SGP during the GEF-7 period.

3) Proposed alternative scenario, with brief description of expected outcomes and components of the project

The relevance and feasibility of the proposed outcomes and outputs have been confirmed through additional expert review and consultative processes in the participating countries (**Refer Section III – Results and Partnerships, Section II, Part (iv) Objective and Strategic Initiatives, of the UNDP Project Document**). Project indicators and targets have been refined to reflect on-ground practicalities and limitations of SGP's context considerations. The text that follows provide the overall proposed scenario for the SGP.

The objective of the project is “to promote and support community-based innovative, inclusive and impactful initiatives and foster multi-stakeholder partnerships at the local level to tackle global environmental issues in priority landscapes and seascapes”.

This objective will be achieved through several strategic initiatives as described below. In alignment with the overall GEF-7 programming, the SGP will focus its efforts on targeted strategic initiatives that promote integrated approaches in addressing key global environmental issues. As an overarching strategy, the SGP will adopt and strengthen its landscape and seascape approach to focus and concentrate its programming on globally recognized important ecosystems (including Key Biodiversity Areas). It will seek synergies, implement multi-sectoral approaches by involving communities at the landscape/seascape levels, and facilitate community actions to effectively manage the complex mosaic land/seascapes. The SGP will seek participation in further conceptualizing Impact Programs and relevant focal area programs and projects, at the same time promoting local community perspectives.

Depending on country and stakeholder priorities under the updated SGP Country Programme Strategy, each SGP country programme may elect to focus on a subset of the strategic initiatives to further sharpen the scope of SGP grantmaking and achieve greater strategic impacts.

•Strategic Initiative 1 – Community-based conservation of threatened ecosystems and species: land and water

Under this Strategic Initiative, the SGP will demonstrate for conservation and sustainable use of threatened ecosystems and species in priority landscapes and seascapes through an integrated approach in alignment with GEF-7 biodiversity, land degradation, and international waters focal area strategies and the Impact Program on Sustainable Forest Management. The SGP grants under this strategic initiative will focus on both conservation and sustainable use: including management and governance of protected areas and corridors, integrated river-basins, and large marine ecosystems with active involvement of communities (e.g. Indigenous Peoples' and Community Conserved Territories and Areas (ICCAs) and private protected areas) as well as mainstreaming biodiversity in key production sectors (e.g. agriculture, forestry, fisheries, and infrastructure). Specifically, the SGP will support appropriate community-based measures that conserve biodiversity and support implementation of protected area/landscape governance in priority landscapes or seascapes bringing under improved management at least 1.2 million ha of terrestrial PAs and MPAs.

With the active involvement of civil society organizations (CSOs) and IPLCs, the project, under threatened ecosystems and species strategic initiative will focus on inter alia:

- a) Improved governance and management effectiveness of terrestrial and marine protected areas and corridors; including Indigenous Peoples and Community Conserved Territories and Areas (ICCAs), private protected areas, KBAs and other effective conservation measures (OECMs);
- b) Improved community-led biodiversity-friendly natural resource use practices and approaches, including agriculture, fisheries, forestry, tourism, and infrastructure;
- c) Freshwater and integrated river-basin governance and management, especially prevention, reduction and management of land-based pollution that flows into rivers and other freshwater systems;
- d) Community solutions in blue economy, including promotion of sustainable fisheries, aquaculture, eco-tourism and conservation and management of coastal habitats for sustainable community livelihoods;
- e) Enhanced community-led actions for threatened species conservation, including addressing human-wildlife conflicts;
- f) Access and benefit sharing of genetic resources, particularly in support of indigenous peoples' traditional knowledge and customary rights.

During the project period, SGP will also support better expression of the value of projects for ecosystem services and ecosystem-based adaptation. The SGP will promote a 'polycentric governance' approach, involving coordinated actions and interventions from different actors, including the government, communities, and the private sector. Priority land/seascape areas will be identified taking into consideration partnerships with relevant GEF FSPs, as well as other projects and partners, to enhance local capacity to form regional networks of communities to deepen cooperation among stakeholders. Under this strategic initiative, the SGP will also be addressing cross cutting issues such as: (i) improving knowledge and information collection and management systems to enhance awareness about best practices on conservation of land and seascapes and their associated biodiversity and ecosystems through communication, documentation and dissemination; (ii) support community-based efforts to improve policies that support conservation and sustainable use; (iii) and ensuring gender considerations mainstreamed into natural resources management. The strategic initiative will implement recommended actions under the

SGP gender mainstreaming strategy including, but not limited to, making sure that gender and socially inclusive perspective is applied to all SGP grant making procedures and activities while also making sure that at the national and project level information is collected and shared across gender and social divides.

•Strategic Initiative 2 – Sustainable agriculture and fisheries, leading to food security:

This strategic initiative will aim to test and promote community-based climate resilient agriculture, fisheries and food practices that improve productivity and increase ecological connectivity and deliver other benefits. The SGP will also promote community-based biodiversity friendly practices and approaches (agriculture, forestry, fisheries and infrastructure) through focusing the grant-making strategy to provide consolidated support to target sectors in previous SGP operational cycles. During the project period, four specific areas of work will be supported including:

- a) Increased efficiency and effectiveness of overall environmentally sound food production and value chains, including certification schemes of organic agriculture, fair trade, and others;
- b) Agrobiodiversity conservation, including extending support to producer networks, movements and value chains among small-holder farmers;
- c) Promotion of agroecological production methods, including diversification and improved livelihoods;
- d) Community-based sustainable fisheries, including promotion of traditional fisheries practices and knowledge; and
- e) Implement community-based actions to remove deforestation from supply chain and expand restoration of degraded lands.

Special attention will be given to agriculture in fragile ecosystems, including mountain communities to improve the livelihoods of mountain peoples. The SGP will work with local farmers and fishers to promote and shift to sustainable agricultural production, support transformation of consumer level production systems and re-focus attention to increasing efficiency and effectiveness of overall food production and value chain addition processes both on-farm and off farm. In addition, support will be provided for integrated projects that aim at restoring ecosystem services or reducing the negative environmental trends such as land degradation and deforestation, biodiversity loss and climate change emissions induced by anthropogenic activities. This strategic initiative will also aim at promoting diversification and improved livelihoods, such as through water harvesting, post-harvest management, business skills development to empower communities to better manage their natural resources and lead to global environment benefits.

This outcome will develop and implement several community-based sustainable land management actions that integrate climate resilient sustainable practices and other standards (e.g. land tenure, community participation). These will be complemented by at least 2 CBOs/farmer leaders who adopt and demonstrate improved climate resilient sustainable land management (SLM) practices per landscape. In this way, more than 1 million ha of landscapes and over 50,000 ha of marine habitats will be brought under improved management and/or restored for multiple benefits while appropriate and improved SLM technologies will be applied to at least 140,000 ha. Beyond that the SGP will support community level measures that promote sustainable fisheries including appropriate efforts to promote a ridge-to-reef approach by linking coastal zone management and land use activities in up lands with marine habitat use and management. Under this strategic initiative, the SGP will work with women entrepreneurs and women led organizations as well as farmers, focusing on agricultural production through improved yields, value addition processes and helping farmers (men/women) to better market their farm products at the right time and with proper prices. Gender roles will be identified and integrated into training and other SGP interventions (e.g. on post-harvest technology to reduce losses in agriculture production).

•Strategic Initiative 3 – Low-carbon energy access co-benefits:

Under this initiative, the SGP will demonstrate and scale up low carbon, viable and appropriate technologies and approaches in partnership with the private sector and government to improve community energy access, in line with larger frameworks such as the UN Sustainable Development Goals (SDGs) and Nationally Determined Contributions (NDCs). The focus will be on providing low-cost bottom-up energy solutions with high potential for carbon emissions reductions using integrated approaches going beyond the energy sector aiming at increasing climate resilience, reducing poverty, enhancing gender equality and achieving theSDGs. Such solutions will continue to form a crucial part of the “decarbonization” and transition to a low carbon economy, while laying the groundwork for new infrastructure at the community level, addressing the energy service needs of

rural, urban and remote communities and entrepreneurs, who cannot be served by the central grid in case of electricity or centralized distribution systems for cooking and heating. SGP will continue to document community innovations, tracking typologies of new community technologies, particularly those emerging from South-South exchanges.

In supporting community-level actions for the implementation of the Paris Agreement with an increased focus on the NDCs, SGP will focus on the following:

- a) Promotion of renewable and energy efficient technologies providing socio-economic benefits and improving livelihoods, including innovative and catalytic financing.
- b) Support off-grid energy service needs in rural and urban areas.

SGP will utilize its proven mechanisms such as the CSO-Government-Private Sector dialogues to galvanize a ‘whole of society’ effort to raise the ambition for climate action, hold local and national governments accountable to the NDC climate measures and ensure inclusion of community voices and priorities in any national and/or local efforts to implement the NDCs. To ensure this complementation, all SGP country programmes will be required to hold consultations to assess the status of NDCs development and implementation in a respective country and conduct at least one CSO-government-private sector dialogue focusing on NDCs during the project period. In countries where NDCs implementation is at the initial stages and/or facing challenges, the dialogue may serve, at a minimum, to familiarize stakeholders with the key aspects of climate policies and create awareness.

Moreover, the focus on low-cost bottom up energy solutions will ensure that significant co-benefits are generated from supporting energy access that contribute towards the achievement of the SDGs. In continuation of efforts of the SGP to identify, describe, measure, and quantify the co-benefits of the decarbonization interventions, during the project period, the SGP will build on this knowledge and broaden its focus to document the links between the 2015 Paris Agreement and the 2030 SDG Agenda at the local level. Several recent studies have demonstrated that climate actions highlighted in the NDCs also have the potential to generate mutual benefits across the 17 SDGs. In this vein, SGP will conduct pilot studies in select countries using new tools and approaches developed by UNDP and partners to demonstrate these links at the local level.

SGP will support innovative technologies and approaches with initial catalytic financing and then encourage wider deployment and scaling up. The absence of effective local applications, tailored to the country and community context, often constitutes a barrier for adoption of low carbon technologies, even in developed countries, despite the availability of certain technologies at the global level. SGP will focus on capacity building, knowledge management and systematization, putting in place enabling frameworks and mechanisms at the community level and will partner with national and global initiatives to ensure that innovations are implemented based on a programmatic approach creating larger impacts. Continuing the efforts started previously, the SGP will focus on building partnerships with larger initiatives in order to scale up successful innovations to the national and global levels.

•Strategic Initiative 4 – Local to global coalitions for chemicals and waste management:

The SGP will aim to demonstrate, deploy and transfer innovative community-based tools and approaches to sound chemicals and waste management, with support from national and international partners, networks and platforms. Under this initiative, the SGP will focus its support towards communities at the forefront of threats related to chemicals and waste, either as users or consumers. Activities will include support for innovative, affordable and practical solutions to chemicals and waste management in joint efforts with partners including with government agencies, research institutions, the private sector and international agencies. The SGP will seek to establish systems of local certification of producers and/or their products, which could then expand to the national level through producer-consumer agreements scaled up to national policies.

The SGP will consolidate its work particularly on pesticide management, waste management, and mercury, and work with partners to promote local to global coalitions and networks that could effectively bring local knowledge and experiences to policy dialogues and vice versa. SGP will also build on its successful previous projects on community-level artisanal and small-scale gold mining (ASGM) in reducing/eliminating use of mercury, and coordinate with the related GEF programs for further replication and scaling up. During the project period, the SGP will develop a viable portfolio on community-based circular economy and plastics management and continue to engage with at least two local-to-global coalitions and networks, including Basel, Rotterdam and Stockholm Convention Secretariat, governments, the private sector, and local to global NGOs. Other chemicals

of global concern (e.g. mercury) and their waste will also be reduced, disposed, eliminated and avoided through targeted initiatives, while a comprehensive awareness and outreach strategy for sound chemicals and waste management will be implemented all SGP countries.

During the project period, among others, SGP will focus on the following four areas of support to:

- a) Prevent or reduce mercury use, and promote alternatives to mercury—implemented mainly through a global innovation program on ASGM and mercury management;
- b) Reduce plastics, and promote solid waste management and circular economy;
- c) Reduce/remove chemicals in sustainable agriculture;
- d) Enhance local to global coalitions on chemicals, waste and mercury management

Under the chemicals and waste management portfolio, many projects have been led by women (these cases were well documented in the SGP publications: “Community-based Chemicals and Waste Management” and the publication “Plastics and Circular Economy: Community Solutions”). While we recognize the importance to engage most vulnerable and marginalized groups in the projects, it is also concerning to point out that waste management, especially informal waste picking and sorting, is often undertaken by women, youth and disabled people who cannot find more profitable, cleaner and respectable jobs, and could also reinforce negative social norms and roles. In GEF-7, SGP under this strategic initiative will focus on organizing and formalizing the waste management sectors informally managed by poor women and help them to develop income-generating activities models such as organic farming, recycling, waste to resource production, and alternative livelihoods, such that SGP interventions support gender transformations rather than entrenching established gender roles. Furthermore, SGP will continue promoting awareness raising, capacity development and networking among women for sound chemicals and waste management.

•Strategic Initiative 5 – Catalyzing sustainable urban solutions:

This strategic initiative will support the promotion of appropriate integrated community-oriented sustainable urban solutions in partnership with the private sector and government. In doing so, the SGP activities will align with and contribute to the GEF Sustainable Cities Impact Program. The SGP will pilot activities to target vulnerable people and communities in urban contexts. During the rapid urbanization process, traditional connections, linkages and networks among local communities can be disrupted and lost, making urban environmental governance more challenging. The SGP will promote an integrated management approach to address urbanization challenges from the point of origin (i.e. in rural areas and migration corridors) to the destinations of people’s movement during this urbanization transition.

Under this strategic initiative, during the project period, SGP will focus on:

- a) Improved capacities to promote community-driven, socially inclusive and integrated solutions to address low-emission and resilient urban development by strengthening capacities of key service providers at the local municipality level to promote community-driven and integrated solutions to address low-emission and resilient urban development.
- b) Demonstrate innovative socially-inclusive urban solutions/ approaches (including waste and chemical management, energy, transport, watershed protection, ecosystem services and biodiversity).
- c) Promote public-private partnership approach to sustainable urban solutions for marginalized urban communities.

Under catalyzing sustainable urban solutions, women as a subsection of the population, particularly with the current migration trends from rural/peri- urban areas to urban areas, are most vulnerable to access to basic services and negative effects of environmental, social and economic impacts. SGP will place an emphasis on building capacities as well as a gender equity-based access herein. This will include support to entrepreneurship, in green jobs, development of new partnerships of private sector- communities and government to support engendered access to green microfinance, skills development and using community evidence to support policy level changes and scaling up of initiatives.

Cross cutting initiatives:

In addition to the above thematic strategic initiatives, SGP will deploy the following cross-cutting initiatives as Grantmakers Plus and social inclusion activities to further enhance innovation, inclusion, and impact. While programming directions and procedures are defined at the global level, the actual activities are identified, planned and implemented at the country level applying the same process as all SGP grants. As such all resources ear-marked as grant-maker plus will be delivered as grants to appropriate CSO/CBO grantees.

•CSO-Government-Private Sector Policy and Planning Dialogue Platforms:

The aim of this Initiative will be to ensure that community voices and participation are promoted and enhanced in the global and national strategy development related to global environment and sustainable development issues. During the project period, the SGP will expand its innovative CSO-Government Dialogue Platforms towards a greater engagement of private sector to leverage its potential to invest and support sustainability at the local level. These platforms will also provide opportunities to discuss possible shifts in relevant policies and practices to promote sustainability. At least 1 national-level targeted CSO-Government dialogues will be convened in each country to support policy and planning development of the government and key stakeholders. At the international level, around 4 global CSO-government and other stakeholder dialogue on the global environment will be organized to expand the dialogue platform for greater engagement of the private sector. At the national level, around 10 CSO-government private sector/business forum will be facilitated to foster CSO-Govt-private sector dialogue on the environment.

•Enhancing social inclusion

The SGP is well recognized for its inclusive approach that promotes social inclusion and equity by working and engaging with women, youth, indigenous peoples and persons with disabilities. The SGP will further enhance its approach to champion and advocate for the involvement and active participation of vulnerable groups as key stakeholders for environmental action and advocacy. This strategic initiative aims to ensure that social inclusion, particularly the empowerment of women, indigenous peoples, youth and persons with disabilities, is further enhanced both through specific initiatives/projects that targets these populations, as well as mainstreaming an inclusive approach throughout all SGP projects on environment and livelihoods improvement.

The SGP Country Programmes will actively support actions to promote women's role in the implementation of projects and promote gender equality and women's empowerment relevant to the local context. To this end, all SGP country programmes will ensure that gender mainstreaming considerations are applied consistently. SGP will contribute to the GEF gender strategy by the following: concrete contributions to close gender gaps in access to and control over resources in at least 30% of the new SGP portfolio; at least 30% of SGP projects are led by women or institute mechanisms for increased participation and decision-making by women; women and girls constitute at least 50% of beneficiaries of all SGP projects.

On Indigenous Peoples, SGP will expand the Indigenous Peoples' Fellowship Program, and further build capacity of IPs through targeted support for IPs to have an increased role in decision-making in relevant countries. Further, in alignment with the GEF-7 biodiversity focal area on inclusive conservation (i.e. role of ICCAs to the CBD Aichi and post-2020 Targets), and in complementarity with efforts to increase IPs engagement with climate mitigations efforts (i.e. CBR+ and other REDD+ standards), the SGP IP Fellowship program will be expanded to include IPs across a range of SGP national-level activities including inter alia: (i) governance and membership of National Steering Committees (NSCs); (ii) SGP country programme strategy (CPS) development, including a dedicated funding window and/or call for proposals from IP organizations as relevant; and (iii) monitoring and evaluation of SGP project outputs and outcomes, including culturally-appropriate formats and methodologies.

The SGP will continue to demonstrate the involvement of youth in SGP projects in at least 30 to 35 percent of its projects. Guidelines and best practices on engaging youth will be developed and widely shared with countries. SGP's youth approach will be realized through systematic piloting in participating countries. Grantmaking will include direct project level investments in priority landscapes and seascapes incorporating a youth theory of change for selected projects working with youth as individuals and as organizations/networks/ councils tackling global environmental issues. Support to capacity development will include investments in skills trainings, mentorship programmes, and channeling

youth perspectives in community, national and international discourses- this will usually be provided through a grantee organization with a focus on youth, as well as through global and regional partnerships such as with the UNDP Youth Co-Lab and the International Youth Day (IYD).

With regards persons with disabilities (PwD), SGP programming will demonstrate and generate lessons and good practices on how environment related projects have the potential to actively promote participation of PwD to ensure concrete results on both environment and socio-economic issues. Engagement with disabled persons organizations will enable integration of important perspectives from people with disabilities into guidelines. SGP grant-making will entail support to community projects with PwD that bring together the cross-sectoral implementation of the SDGs as well as the consideration of the “Sendai Framework” on Disaster Risk Reduction and Recovery (DRR&R). Working with a disability focused organization, SGP will also support capacity development including training to proponents on appropriate project design and monitoring and evaluation. In the spirit of integration, SGP will invest in efforts to promote integrated approaches that address all social inclusion aspects – gender, youth, indigenous peoples, PwD – wherever possible, feasible and appropriate.

•**Monitoring and Evaluation**

During the project period, SGP will develop a common, robust M&E and knowledge management strategy is implemented in all countries. Building on the recommendations of the 2015 Joint GEF-UNDP Evaluation, efforts will be made to improve existing M&E, design more streamlined and useful tools and activities that balance the need to measure and capacity of local CSOs and communities. SGP will revamp its Results Based Management Strategy, capturing key objectives, processes and responsibilities. An online database to support generation of both quantitative and qualitative analytics will be undertaken. The SGP will also monitor, measure and report its contribution in alignment with 5 of the 11 most relevant GEF-7 results framework and indicators (please see section **UNDP Project Document Section V - Monitoring and Evaluation Plan and CEO Endorsement Request section 9** for further details) while continuing to use its comprehensive set of indicators to report on other socio-economic results that are not captured.

•**Knowledge Management:**

This strategic initiative aims to ensure that all countries contribute to the knowledge management strategy, as knowledge management supports wider adoption of the innovative solutions in its portfolio at national and global levels. At the global level, knowledge exchanges and innovation will be promoted through SGP’s revamped knowledge platforms: The Digital Library of Community Innovations and the South-South Exchange Initiative. The digital library is an effort to document and curate the innovative solutions developed by indigenous peoples and local communities to environment and sustainable development challenges. The SGP will partner with relevant organizations to expand the reach and use of these practices. The South-South Exchange initiative will continue to support knowledge transfer and exchange across countries and regions encouraging replication of good practices supported by the portfolio. These initiatives produce high impact and scaling up of the innovations and practices developed by SGP grantees, as well as other CSOs at the regional level. Another mechanism is *Communities Connect*^[1], a collaborative platform started in partnership with the GEF CSO Network, to promote the solutions created by communities and civil society organization to sustainable development issues which will be revamped and strengthen during the GEF-7 period (please see **Section II – Part (iv) Objective and Strategic Initiatives of the UNDP Project Document and CEO Endorsement Request section 8** for details).

4) Alignment with GEF focal area and/or impact program strategies

As a GEF corporate programme, SGP has always aligned its operational phase strategies to that of the GEF with the expectation that its role is to translate these high-level strategies to community and local CSO actions and provide a testing and evidence base for further scaling up. SGP contributes to achieving the GEF’s strategy outcomes by supporting innovative initiatives at the level of communities. The results framework for the GEF-7 SGP and associated targets for global environmental benefits will also align with the overall GEF-7 results architecture.

During GEF-7, the Impact Programs will be a key vehicle for the GEF to help countries pursue holistic and integrated approaches for greater transformational change in key economic systems, and in line with their national development priorities. The Impact Programs collectively address major drivers of environmental degradation and/or deliver multiple benefits across the many thematic dimensions the GEF is mandated to deliver. The Impact Programs also contribute in significant ways to each of the Focal Area Strategies while at the same time delivering multiple benefits across several MEAs. As noted in the GEF Council approved paper on GEF Small Grants Programme: Implementation Arrangements for GEF-7, SGP will seek to coordinate and provide community-level inputs to the Food, Land Use, and Restoration (FOLUR) Impact Program through its activities under the Strategic Initiative on Sustainable Agriculture and Fisheries, while the approaches under the Strategic Initiative on Catalyzing Sustainable Urban Solutions will be implemented and closely aligned with GEF-7 Impact Program on Sustainable Cities. The specific modality for coordination will be further explored as the Impact Programs are designed. Initial discussions on synergy with the Sustainable Forest Management (SFM), FOLUR and Sustainable Cities impact programs are underway.

In order to enable strategic investments that are strongly aligned with the GEF-7 focal area and Impact Programs, SGP grantmaking at the country level will be implemented based on the Country Programme Strategy (CPS) for GEF-7 that further clarifies alignment based on country specific context. The new CPS will be prepared by each country to enable country-driven and integrated investments at the country and landscape/seascape levels. In all countries, the CPS development process will be undertaken in a consultative manner to identify SGP's value added within the priority global environmental issues in line with the concerned MEAs and national policies and plans to guide SGP grantmaking and ensure its complementarity with other donor and country supported initiatives. The CPS will ensure that the SGP grant-making strategy is consistent with the GEF-7 Programming Direction and specific focal area strategies. For example, in Biodiversity, the project will support the CBD's 2020 Aichi targets, those related to protected areas (11), ecosystem services (14) and traditional knowledge, innovations and practices (18), and contribute to the negotiations and development of the post-2020 targets to be agreed upon at CBD COP15 in China in October 2020. During the project, SGP will contribute directly to the relevant GEF core indicators such as the area of terrestrial and marine PAs under improved management and governance effectiveness, area of landscapes/seascapes under improved management to benefit biodiversity and ecosystems. Similarly, for Land Degradation, SGP initiatives will contribute to the Land Degradation Neutrality (LDN) and promote sustainable agriculture, fisheries and food systems at the community level through improving productivity, livelihoods diversification and improvement and promotion of technologies such as sustainable land management, harvesting, post-harvest management, business skills development to empower communities to better manage their natural resources. It will contribute directly to GEF-7 core indicators such as the area under SLM. Likewise, SGP programming at the country level will be in alignment with and contribute towards the achievement of the country's NDCs including as appropriate supporting community-level actions to enhance ambition and delivery of NDC measures at the local level.

5) Incremental/additional cost reasoning

There are no changes from the PIF in the incremental reasoning. Baseline projects as well as other contributions to the project's baseline and co-financing are provided in the UNDP Project Document Section IV (Results and Partnerships) for the various project component, and Section IX (Financial Planning and Management).

The total GEF Core grant fund that has been approved by the GEF-7 Replenishment and Council is \$128 million, along with the provision to have additional STAR allocations as per the SGP implementation Arrangement for GEF-7. The Part 1 project of the 7th Operational Phase of the SGP is financed through a GEF grant of USD \$64 million with co-financing of US\$ 64 million as per the PIF that was approved by the GEF Council in Dec 2018. The Part 1 project is planned to cover first two years of grant allocation to country programs, while the implementation duration of the community projects can go beyond, including budgets related to knowledge management, monitoring and evaluation, and programme management. Part 2 of the GEF-7 SGP project with an additional \$64 million will cover the other half of the four years of implementation.

As per the Council approved SGP Implementation Arrangement for GEF-7 and the Information Paper that followed, initial grant allocation to countries are expected to be made on an equitable basis across all eligible and interested countries with the provision to make reallocation of any unused core funds across eligible and interested countries with a view to promoting the effective and efficient utilization of the GEF-7 core envelope. The initial allocation is expected to be around \$500,000 per country for existing countries and prorated for new countries depending on when they join the SGP during GEF-7.

The indicative co-financing for the project has been confirmed, reaching a total of USD \$64 million which is the same as that reported during the PIF targets. As can be seen from Table C, significant parallel co-financing investments have been proposed by the key actors (including participating governments, CSOs, private sector and UNDP) to all the areas covered by the project. These investments consist of both cash going through SGP and cash managed in parallel. Notwithstanding the form of co-financing, these resources will be allocated through complementary activities related to SGP's grant making at the community level to address key global environmental challenges. In addition, in-kind costs have been assigned to costs of staff from various partners and local community organisations.

6) Global Environmental Benefits.

The global benefits that will be delivered have been captured under the contribution to the GEF core indicators in Table F. However, as the core indicators does not fully capture the gamut of results delivered by the SGP through its decentralized community-based operations, the following details may be referred to (please see **SECTION III – Results and Partnership, Part (i) Expected Results**).

In summary, under this project, SGP plans to deliver the following global environmental benefits:

- On biodiversity, the grant-making approach will target to improve management and governance effectiveness of 1.1 million hectares of protected areas and indigenous peoples' and community conserved territories and areas (ICCAs). Community level biodiversity compatible practices will also be promoted in around 50,000 hectares of marine habitats and MPAs.
- On climate change mitigation, SGP portfolio will apply low carbon technologies that will target around 7,500 households and increase installed total renewable energy (RE) capacity of 300 KW from around 25 technologies that will be demonstrated. SGP interventions will also support 7,500 hectares of forest restoration/avoided deforestation. Likewise, for sustainable urban solutions, SGP will identify, test and demonstrate around 25 innovative integrated urban energy solutions.
- On land degradation, around 140,000 hectares of land (forest, agricultural and other production sector lands) will be brought under improved management practices, including through the application of improved SLM technologies at the farm level while several CBO/farmer leaders will be established to promote and demonstrate climate resilient SLM approach.
- For international waters, efforts will be implemented to curb land-based pollution, including solid waste, sewerage, waste water, and agricultural waste from entering the waterbodies, and open burning avoided, will be continued (target to be assigned). This will benefit around 50,000 ha of marine habitats.
- On chemicals and waste management, a total of 150 tons of POPs containing products/materials will be removed or disposed while a comprehensive strategy to deal with all chemicals of global concern will be implemented together with an awareness and outreach strategy on sound chemicals management in all countries.
- For towns and cities, SGP will implement sustainable urban solutions related activities in at least 10 countries piloting at least 10 different urban solutions to address significant urban environmental issues from the community end.

6) Innovativeness, sustainability and potential for scaling up.

Innovation is a cross-cutting thread across all SGP's interventions. Innovation is not just as an integrated approach for project execution but is also a key result. The micro, and local nature of SGP projects, provides an ability to assess risk, as well as an experimental modality to undertake effective and efficient community led solutions tailored to the local context. . Through its demand-driven approach, combined with flexibility, accessibility, and risk taking, SGP represents an incubator of innovation. The SGP is developing a new standardized measure to assess innovation during project implementation. These include: (a) distinct way to discern the problem; (b) reorganized (and often better) use of available resources; (c) unique ways to connect; (d) incremental revolutionary conception; (e) original creation; (f) and powering local innovators. Thus, SGP's approach encourages local innovation and creativity through its bottom-up and participatory practice in the design of projects, in the recognition of the relevance and value of local or traditional knowledge, and in allowing greater flexibility and adaptive management of projects.

Community innovations in SGP are manifested in the testing and ground-truthing of low-cost technologies and sustainable production methods; in new methodologies for the involvement of stakeholders; and in integrating traditional decision-making processes within the wider frameworks and actions relevant to meeting country commitments to international environmental agreements. Since SGP funding is modest and its interventions are designed to be initially small scale, the programme can readily support community-based experimentation. Once a novel idea has been tested on the ground and proven to be effective in meeting community needs, it can often take off more widely through grantee networks as well as networking with other CSOs, further resulting in more innovations and eventually attracting additional donor and/or government support for wider application. This innovation process is supported through the digital library of community innovations, building on the tens of thousands of SGP-supported projects, as well as via the South-South Community Innovation Exchange Platform to share these innovations across countries.

To encourage innovation within the portfolio, and to explore the full potential of the SGP as an incubator, during the GEF-7 period, SGP will track such innovation results in terms of the invention of product, service or process, leveraging local assets and resources, relevance to local unmet needs, and potential of scaling up/ replication. Building on recommendations to collect and aggregate common standardized measures across SGP projects, there will be an initial piloting of a measurement called the 'SGP Innovation Meter'. This measure will cover different types of innovations, including disruptive and sustaining/incremental innovations that SGP is involved in supporting. The approach will measure innovation both from the standpoint of the coverage of the portfolio and also the depth of innovation in the portfolio. In addition, SGP will continue with the design and implementation of Innovation Programs through interested and engaged SGP Country Programmes on specific thematic issues. Knowledge management and leveraging resources will retain prominence in the Innovation Programs.

Achieving sustainability of project outcomes is central to the SGP. According to the IEO Joint Evaluation in 2015, the SGP has secured a high success rate in sustaining project results. Project proponents are required to build measures into their project design that increase the likelihood of outcome sustainability, including through the development of an appropriate exit strategy. The screening of project proposals by the National Steering Committee (NSC) includes a systematic assessment of whether such measures are sound and based on realistic assumptions. Project logical frameworks include outcome indicators that are monitored periodically. Project monitoring activities are designed to verify that initial assumptions hold, and that the required elements for outcome sustainability are in place. Most grants include a capacity development component and a sustainable livelihoods component to ensure that achievements will be sustained at the smallholder and resource-user level. Proactive adaptive management is applied throughout the life of the projects by the National Coordinator (NC) who works with SGP grantees to take corrective action whenever there are indications that project outcomes may be compromised or may not be sustained after the project ends. SGP does not generally support the creation of new organizations, but rather strengthens existing CBOs,NGOs, coalitions and networks.

Although most communities continue applying acquired skills in their day-to-day work, SGP ensures retention of new skills through various means including: (i) inviting leaders or members of former grantee organizations to new training; (ii) using former SGP grantees as trainers for other communities and projects; (iii) continuing to monitor and engage with former grantees and trouble-shooting as much as possible; and (iv) establishing mentoring and peer-to-peer support among communities. Ultimately, the sustainability of SGP projects results from the strong ownership of the community or CSO grantee-partners to the actions taken and resulting outcomes, including the empowerment built in the process of implementation, and the fact that SGP projects are often meeting communities' most important basic needs particularly for sustainable livelihoods. SGP's Grantmakers Plus initiatives is specifically geared towards sustainability and will promote an enabling environment to scale up the impacts of SGP Strategic Initiatives, nationally and globally, through networking and knowledge exchange.

With regards to scaling up, the majority of SGP innovations have scaling up potential. This is emblematic in the fact that among the 60 cases [2]² assessed for a study by the GEF IEO[3]³ in 2019 for evaluating scaling up in the GEF, 14 consisted of SGP projects. This is because successful SGP projects are solutions that are relevant to a thousand-fold more communities under similar situations within the country of implementation, and across other countries. Community-based approaches are inherently more cost-effective in their utilization of existing resources and hitherto untapped resources thereby providing a good model for larger projects concerned with efficiency and sustainability. The highly consultative and participatory processes, including the direct access to funds, practiced in SGP projects, can provide valuable lessons for larger government and donor programs. Notable too is the global reach of SGP – 128 participating countries – which combined with good systems for sharing, can scale up, mainstream, and replicate successful community projects. Moreover, as pointed out by the GEF IEO study, the UNDP-implemented SGP “structure is particularly conducive for interactions” [frequent interactions to exchange knowledge and information] due to its decentralized structure at the country level, long term and local presence, and commitment to building multi-stakeholder networks, which represent crucial factors for scaling up success.

Scaling up, as well as mainstreaming and replication, are processes that require a proactive approach and additional resources especially for communities and CSOs that have only recently completed their first projects. SGP's main role in the scaling up process is to demonstrate or showcase the successful innovation to a wider set of stakeholders, as well as to establish networks/linkages for pooling of effort and resources by various actors. At the portfolio level, SGP has utilized its NSCs, grantee-partner networks and allied CSO networks to have community innovations and successes recognized and adopted at the national level by policy-makers.

During GEF-7 SGP will encourage strong partnerships with the private sector to commercialize successful projects with the aim to shift renewable energy projects from pilot innovations to the mainstream. This will be achieved through, but not limited to, the CSO-Government-Private Sector dialogue platforms. The Grant Maker Plus funds that support such CSO-government dialogues was recognized by the IEO study as enabling SGP country programs to provide a platform for stakeholders to reflect on issues such as how implementation at the higher scale could be adapted to improve outcomes.

[1] <http://data.communitiesconnect.net/>

[2] Cases (projects) were selected for assessment based on their degrees of quantitative and qualitative information on scaling up outcomes. Additionally, the review identified 65 cases in 50 countries where some extent of scaling up in SGP projects had occurred.

[3] GEF IEO (2019). Evaluation of GEF Support to Scaling up Impact. 56th GEF Council Meeting Document. Washington, DC

1b. Project Map and Coordinates

Please provide geo-referenced information and map where the project interventions will take place.

A global overview of the SGP operations in the existing SGP (110) core programme countries is provided. This will be updated during GEF-7 when new eligible countries join the SGP. Specific landscape and seascape as well as individual project coordinates will be provided once the country program strategies are developed and during project implementation. Details of the projects supported will be reported to the GEF during periodic annual reports.

1c. Child Project?

If this is a child project under a program, describe how the components contribute to the overall program impact.

No

2. Stakeholders

Select the stakeholders that have participated in consultations during the project identification phase:

Civil Society Organizations Yes

Indigenous Peoples and Local Communities Yes

Private Sector Entities

If none of the above, please explain why:

Please provide the Stakeholder Engagement Plan or equivalent assessment.

In addition, provide a summary on how stakeholders will be consulted in project execution, the means and timing of engagement, how information will be disseminated, and an explanation of any resource requirements throughout the project/program cycle to ensure proper and meaningful stakeholder engagement.

Select what role civil society will play in the project:

Consulted only;

Member of Advisory Body; Contractor; Yes

Co-financier; Yes

Member of project steering committee or equivalent decision-making body; Yes

Executor or co-executor; Yes

Other (Please explain)

(Please also see **Section III – Results and Partnership, Part (ii) Partnerships and Part (iv) Stakeholder Engagement Plan of the UNDP Project Document**).

SGP grants are never implemented in isolation but are rather embedded in a web of partnerships that extend from the local to the national to the global. SGP partnerships have increased broad-based support for global environmental and sustainable development approaches and policies. They have enabled capacity development and learning at different levels; leveraged both financial and technical resources to strengthen programmatic approaches as well as individual projects; and helped to ensure the sustainability of initiatives. SGP synergies with partners have allowed them access to SGP staff, resources, methodologies, tools, knowledge, and experience, making the partnerships mutually beneficial.

Partnerships with local and national governments, other donor programs and projects, the private sector, and NGOs and CBOs contribute in-kind or financial resources that allow GEF SGP projects to fully cover sustainable development objects that are critical for their success. They have also provided financial resources for essential programmatic activities that cannot be undertaken with GEF funds alone. SGP dedicates efforts to build strong partnership with specific national level organisations including Indigenous Peoples Organisations as a successful targeting strategy to not only raise awareness about SGP project opportunities but to also coordinate strategic efforts in resource mobilization and policy impact.

In line with the partnership-based approach, SGP will work with international partners especially in the biodiversity area such as: (i) voluntary IUCN Commissions, including the World Commission on Protected Areas (WCPA), Commission on Ecosystem Management (CEM), and Species Survival Commission (SSC) which has a number of specialist sub-groups working on particular species; (ii) Global ICCA Consortium, a membership-based coalition of grass-roots CSOs working to support the objectives of the CBD; (iii)

Birdlife International's network of site support groups (SSGs); (iv) Fauna and Flora International (FFI), active in supporting locally-managed marine areas; (v) The Nature Conservancy (TNC), including with respect to private protected areas and marine conservation area spatial planning; as well as (vi) the Wildlife Conservation Society (WCS), who have strong comparative advantage in relation to baseline scientific assessments and wildlife monitoring techniques.

Within UNDP, collaboration will be explored with the 'Lion's Share Fund' working with private sector companies that use threatened species as part of their logos and/or marketing campaigns. Partnerships may also be established with Medium of Full-Size GEF projects, either through UNDP and/or other accredited GEF agencies, in support of GEF-7 Impact programmes, including for example with respect to the Sustainable Forest Management, Sustainable Cities, and the Food Systems, Land Use and Restoration impact programs. In this partnership approach, SGP will continue exploring opportunities to serve as a delivery mechanism for GEF full-sized projects as well as large projects and programs of other donors, funding facilities, and national governments. SGP achieves greater impact in GEF's focal areas by incorporating and expanding the community-based approach into the design and implementation of medium-sized or full-sized projects.

SGP will continue to build synergies and align interventions with development partners including the World Bank, regional development banks, bilateral agencies and GEF full size projects to scale up successful innovative initiatives. In the climate change area, the alignment with NDCs will help bring SGP interventions to scale and integrate them into national energy and climate policies. Wider application of the CSO-Government- private sector dialogue instrument will also help initiate new partnerships and inform national policies. These larger initiatives will provide a platform for scaling up SGP work as well as possible co-financing and joint efforts in national and global planning and policy advocacy. SGP will also encourage strong partnerships with the private sector to co-finance and eventually commercialize successful projects with the aim to shift renewable energy interventions from pilot innovations to the mainstream. SGP is also collaborating with global and regional organisations to leverage resources to implement and scale up community-based actions- in specific geographic regions and/or thematic areas. Many such collaborations are underway including inter alia with SOS-Sahel; Slow Food International and the FAO Mountain Partnership on sustainable mountain products; and Caribbean Biodiversity Fund (CBF) . In implementing these collaborations, SGP and the partner organizations commit parallel resources that are utilized to fund joint initiatives in the target countries, thereby achieving increased efficiency and synergy in scaling up successful community driven and innovative activities.

At a global level, CPMT is developing partnerships with leading research institutions to inform the design and outcomes of small-scale energy investments to maximize impacts and sustainability as well as measure results effectively. Likewise, in sustainable chemicals management, the SGP will seek to work with GEF GOLD program, UNEP, UNDP and others to ensure linkages and synergies of project activities in the field and facilitate sharing and learning. SGP will continue working with IPEN and Zero Mercury Working Group to promote local to global coalitions. CPMT is also investing in exploring partnership for potential funding from the Green Climate Fund (GCF) for Indigenous Peoples. Building on the UNDP collaboration with Climate Justice Resilience Fund (CJRF) and Tebtebba on IPs engagement with GCF, CPMT led a global consultation workshop at COP22, Marrakech (UNDP, Tebtebba, CJRF, partners) followed by several national level engagement with GCF National Designated Agencies (NDAs) in target countries. The aim is to motivate for a dedicated call for proposals for IPs while building capacity for IP organisations to access such funds. Partnerships among GEF SGP grantees and CSO partners over time yield networks that enable improved natural resource management, capacity development, knowledge exchange, policy advocacy, and sustainability of SGP and related initiatives. These networks expand SGP's reach, involving greater numbers of organizations and communities in activities related to SGP objectives, and lead to greater impacts through replication and policy influence. This has been highlighted as a key factor by the GEF IEO study on scaling up as for successful scaling up outcome.

Beyond that, SGP operates through a multi-stakeholder approach engaging a range of stakeholders including NGOs, CBOs, indigenous peoples, the private sector, government, academia, and donor partners. Civil society organizations (CSOs) will be both beneficiaries and direct participants in SGP through their inclusion in NSCs, where non-governmental members must be in the majority, as well as by taking on the role as National Host Institutions (NHIs) and other key roles related to knowledge sharing and policy

advocacy. Although grants are targeted towards CSOs, particularly community-based and non-governmental organizations, a broad range of stakeholders are crowded in and engaged as active partners in program management and during grant implementation, including inter alia research institutes, local and municipal governments, international NGOs, as well as national and international volunteers.

Regarding indigenous peoples and persons with disabilities (PwD), SGP has developed a guideline document on each and follows a set of principles that advocate for a flexible, time sensitive, and simple project cycle to allow these groups to access SGP support. The programme has pioneered numerous user-friendly, accessible modalities to work with poor and marginalized groups including alternative proposal formats such as participatory video (PV), Almanario, photo stories, and community theatre, and allowances are made for concept and project submission in local and vernacular languages so long as these concepts and proposals adhere to the basic project elements. SGP also allows for flexible disbursement terms to cope with indigenous peoples' culture, customs and seasonal movements. SGP makes extra efforts to reach out people and groups that are often marginalized or disadvantaged, including through the use of planning grants that facilitate development of full proposals and through the use of alternative proposal formats (e.g. video, photo stories) to improve access to SGP projects from these groups. Empowering women and engaging youth are two important initiatives of SGP. SGP NSCs at the country program level designate focal points for gender and youth to ensure their voices are heard, and that appropriate engagement in project design and implementation is ensured. Additionally, through stakeholder workshops, communication through mass media and targeted outreach by the NC in respective countries, CSOs can learn of SGP projects and activities and provide inputs on how to improve on them. An independent consultant review^[1] has confirmed that support to indigenous peoples constitute at least 30 percent of the SGP portfolio in the 90 participating countries with Indigenous Peoples. The review reports that SGP support to IPs has remained relatively stable or growing over time, with IPs and their organisations in some instances representing over half of the SGP portfolio.

As for the private sector, SGP will include mechanisms for engaging with private sector through both targeted platforms such as the CSO-Government-Private sector dialogues and through regular grant projects by fostering the enhanced involvement of the private sector through public-private partnership and other means. In line with the GEF-7 Programming Directions emphasis on engagement with the private sector, the SGP will enhance its engagement with the private sector through a number of ways including: (i) development of a private sector strategy; (ii) reviewing past and existing portfolio; (iii) analyzing potential ways to enhance engagement and influence businesses toward sustainable practices and options that generate multiple environmental benefits, and (iv) exploring potential opportunities for financial and technical support that can help scale up SGP innovations. Please see section 4 below for a detailed consideration of how SGP will engage with the private sector.

In GEF 7, SGP financed projects will give more attention to the promotion and support of innovative and scalable initiatives at the local level to address global environment issues in priority landscapes and seascapes. It also will support those projects that could serve as incubators of innovation, with the potential for broader replication of successful approaches through larger projects supported by the GEF and/or other partners. In this context, the SGP will strengthen its partnership approach as a CSO-led multi-stakeholder platform by working closely with the private sector and with governments. With this aim, in GEF 7, the SGP will expand its innovative CSO-Government Dialogue Platform toward greater engagement of the private sector to leverage its potential to invest and support sustainability at the local level, including businesses relating to tourism, agriculture, forest and other relevant sectors. These platforms will provide opportunities to discuss possible shifts in relevant policies and practices to promote sustainability.

[1] Laura Ledwith (2019). Strengthening GEF SP support to Indigenous Peoples: A review of SGP's 25-year portfolio

3. Gender Equality and Women's Empowerment

Provide the gender analysis or equivalent socio-economic assesment.

The SGP has been widely recognized for the efforts to promote gender equality and women’s empowerment. A large proporportion of SGP projects are assessed as gender responsive while several proactive measures were implemented to mainstream gender during the OP 6 period. During the GEF-7 period, the SGP will build on the strong results to deliver concrete gender outcomes by reviewing and enhancing its gender strategy and guideline for programme and project operations. This could include reviewing the strategy to enhance gender equality in SGP governance (e.g. National Steering Committee and Country Program team composition), grant selection and management. The SGP will also fully roll out the GEF Gender Implementation Strategy in the grant-making process. At the portfolio level, the SGP will measure and report on the GEF gender tags such as: (i) contributing to closing gender gaps in access to and control over resources; (ii) improving the participation and decision-making of women in natural resource governance; and (iii) targeting socio-economic benefits and services for women. The current project has established targets for these gender tags (see table B).

Furthermore, the SGP has been an active member of the GEF Gender Partnership, contributing to the review of gender indicators and the gender policy. The GEF Gender Partnership launched the first online course on gender and environment during the 5th GEF assembly in June 2018. The SGP will expand the online course to offer modules in French and Spanish. This was also recognized by the GEF IEO (OPS Sub-study) on “Evaluation of Gender Mainstreaming in the GEF 2017”^[1] which noted that the important SGP contribution to gender equality, specifically the design and roll out of the e-learning on gender and environment to support capacity development in agencies and partners. In addition, SGP will also pilot a focused innovation programme on women entrepreneurship^[2] with the objective to upgrade and expand existing green women-led enterprises for wider replication and scale up. This programme will provide women-led enterprises with business management training, technical training, product development and design, business counselling, marketing assistance, finance facilitation and business networking and business linkages. (Please also see **Section III – Results and Partnership, Part (v) Gender Equality and Women’s Empowerment of the UNDP Project Document** for details)

[1] [1] <http://www.gefio.org/evaluations/evaluation-gender-mainstreaming-gef-2017>

[2] According to the ILO (2009), enterprise development can make a significant contribution to women’s empowerment and gender equality and has a key role in gender strategies.

Does the project expect to include any gender-responsive measures to address gender gaps or promote gender equality and women empowerment?

Yes

Closing gender gaps in access to and control over natural resources; Yes

Improving women's participation and decision making Yes

Generating socio-economic benefits or services or women Yes

Does the project's results framework or logical framework include gender-sensitive indicators?

Yes

4. Private sector engagement

Elaborate on the private sector's engagement in the project, if any.

In line with the GEF-7 Programming Directions, the SGP will enhance its engagement with the private sector through a number of ways, notably by: (i) developing a private sector strategy; (ii) reviewing the past and existing portfolio; (iii) analyzing potential ways to enhance engagement and influence businesses toward sustainable practices and options that generate multiple environmental benefits; and (iv) exploring potential opportunities for financial and technical support that can help scale up SGP innovations. SGP projects at the local and national levels are designed to provide community-based solutions to complex environmental problems. Given the inter-related and integrated nature of such environmental problems, engagement with and partnership with a wide variety of stakeholders and actors including the private sector will be important if the programme is to effect meaningful and transformative change – be this through transforming policies and regulatory frameworks or through building capacities at the community level.

During GEF-7, SGP financed projects will give more attention to the promotion and support of innovative and scalable initiatives at the local level to address global environment issues in priority landscapes and seascapes. It also will support those projects that could serve as incubators of innovation, with the potential for broader replication of successful approaches through larger projects supported by the GEF and/or other partners. In this context, the SGP will strengthen its partnership approach as a CSO-led multi-stakeholder platform by working closely with civil society networks, the private sector and with governments. With this aim, in GEF 7, the SGP will expand its innovative CSO-Government Dialogue Platform toward greater engagement of the private sector to leverage its potential to invest and support sustainability at the local level, including businesses relating to tourism, agriculture, forest and other relevant sectors. These platforms will provide opportunities to discuss possible shifts in relevant policies and practices to promote sustainability.

Engagement with civil society networks and the private sector will be explored across all the thematic areas. For instance, in the agriculture and food, the SGP will foster partnerships with the private sector and other CSOs to explore innovative, affordable, and practical solutions to chemicals and waste management while also seeking to establish systems of local producer and/or product certification as an initial step toward expanding to producer-consumer agreements – a process in which the private sector should be fully engaged with. Likewise, in the climate change thematic area, the role of the private sector and CSOs is critical in ensuring the sustainability and affordability of low carbon technologies promoted at the community-level and similarly private sector partnership and support will be crucial for delivering the GEF 7 Strategic Initiative on catalyzing sustainable urban solutions. In biodiversity, SGP projects will explore opportunities to engage with civil society networks and the private sector in supporting community-based eco-tourism activities to generate incentives to local communities for managing / conserving biodiversity. SGP country programs will explore opportunities to link smallholder producers and pastoralists to markets and technologies. Finally, under the chemicals thematic area, SGP country programs will work with other national and local stakeholders to identify and support exploration of incentives for civil society involvement to sustainably eliminate chemicals. To this end, the SGP will strive to share information on its operations in respective countries widely with CSOs and the private sector to explore opportunities for cooperation. (Please also see **Section III – Results and Partnership, Part (iv) Stakeholder Engagement Plan of the UNDP Project Document**)

5. Risks

Elaborate on indicated risks, including climate change, potential social and environmental risks that might prevent the project objectives from being achieved, and, if possible, the proposed measures that address these risks at the time of project implementation.(table format acceptable):

The main risks and mitigation measures have been further elaborated from the PIF. Please refer to **Section X – Risk Management and Section III – Results and Partnership, Part (iii) Risks, of the UNDP Project Document**. As per standard UNDP requirements, UNOPS as the Executy partners will monitor risks quarterly and report on the status of risks to the UNDP. The UNDP will record progress in the UNDP ATLAS risk log. Risks will be reported as critical when the impact and probability are high (i.e. 5). Management responses to critical risks will also be reported in the Annual Monitoring Reports.

6. Institutional Arrangement and Coordination

Describe the institutional arrangement for project implementation. Elaborate on the planned coordination with other relevant GEF-financed projects and other initiatives.

The details of the institutional arrangement and coordination are provided in **Section VI - Governance and Management Arrangements of the UNDP Project Document**. The SGP's governance and management arrangements are guided by the SGP Operational Guidelines, slightly revised for each phase, and can be summarized as below:

At the global level, the SGP Steering Committee (SC), provides the strategic corporate programme vision and long-term strategy for the SGP, and enables linkages with the GEF, its agencies and CSO stakeholders. The SGP Steering Committee is composed of the GEF Secretariat as the Chair, the UNDP GEF unit, the GEF CSO Network, and the SGP Central Programme Management Team (CPMT) as secretariat to the committee. The Committee is tasked to: (1) provide overall strategic direction to the SGP corporate programme vision and long-term strategy; (2) provide guidance and enable linkages with the GEF, its partner agencies and CSO stakeholders; (3) establish country participation policy to include start-up of new Country Programmes as well as upgrading of existing ones; (4) strongly support SGP's resource mobilization efforts and facilitate establishment of strategic partnerships where useful; (5) promote strengthened linkages between SGP and GEF projects and programmes; (6) review, strengthen, and endorse the SGP Operational Phase Strategy, and; (7) engage in periodic strategic review of the SGP programme status, including information provided by UNDP in the SGP Annual Monitoring Report.

Additionally, the SGP Project Board chaired by UNDP-GEF on behalf of UNDP as the 'Project Executive' member of the Board, with participation of UNOPS as the Implementing Partner, and SGP CPMT as the project management team, provides overall guidance, direction and oversight to the project, including its management, and is accountable for project success. The SGP Project Board usually meets twice annually to review strategic matters concerning programme implementation and oversight.

UNDP is the GEF Agency which implements the SGP as a global GEF corporate programme for both GEF-funded activities and co-financed projects delivered through SGP. In this way, UNDP provides value-added benefits as programme implementation proceeds in synergy with overall UNDP and UNDP CO programming. Moreover, UNDP provides quality assurance and oversight services for the SGP through its headquarters, regional and country office levels. As defined by the GEF Council, these services cover: (a) project cycle management services which entail quality assurance and oversight across the full project cycle of project identification, preparation of the project concept for the Operational Phase, preparation of a detailed project document, project approval and start-up, project implementation and supervision, and project completion and evaluation; and (b) corporate services in relation to the formulation of policy and strategy for the GEF. UNDP is represented on the SGP Steering Committee as well as the Project Board as described below.

As the Executing Agency, UNOPS is the entity to which the UNDP Administrator has entrusted the implementation of UNDP assistance specified in the signed project document along with the assumption of full responsibility and accountability for the effective use of UNDP resources and the delivery of outputs, as set forth in the document. UNOPS provides programme execution services including administrative, financial, legal, operational, and procurement for the SGP as described in detail in the UNOPS SGP Standard Operating Procedures (SOPs). The UNOPS SGP Cluster works closely with the CPMT and Upgraded Country Programme (UCP) teams. The relationship between UNOPS and UNDP (including COs) is guided by the umbrella MOU[1] signed by both agencies. These include the arrangements covering UNDP CO support to SGP local administration and activities. To facilitate global coherence in execution of services, organizational policies, and operating procedures, UNOPS maintains a small grants cluster team[2], which coordinates with SGP CPMT and UNDP/GEF HQ respectively. This UNOPS small grants cluster also represents UNOPS on the Project Board, which is coordinated by UNDP/GEF HQ, and includes the SGP CPMT.

Other GEF agencies including international NGOs such as Conservation International, the International Union for Conservation of Nature (IUCN), and World Wildlife Fund (WWF), have been closely involved with SGP operations in many countries. Representatives of international NGO country offices are frequently involved as NSC members. Local CSO partners of these GEF Agencies have been mobilized to apply for and access SGP grants. These GEF Agencies are often engaged in cofinancing SGP projects, knowledge sharing, and collaboration on related events and workshops at the country level. Under GEF-7, the SGP will continue to proactively pursue collaboration with other GEF Agencies for relevant activities and events to enable mutual learning and knowledge exchange, as well as explore strategic partnerships at the global and country levels. There is also potential for an SGP Country Programme to act as a community-based granting mechanism for GEF and non-GEF funded projects of GEF Agencies, as has taken place for several projects with UN Environment.

The SGP Central Programme Management Team (CPMT) at UNDP manages the SGP global programme and has overall responsibility for supervising the SGP Country Programme and for the technical and substantive quality of SGP country portfolios. CPMT develops global strategy, guidelines and standards in the development of SGP projects with the objective of ensuring quality, while also facilitating the design of proposals. CPMT supervises SGP National Coordinators and facilitates the start-up of new Country Programmes. CPMT is supported by and coordinates the work of UNOPS, which provides execution services. The CPMT consists of a Global Manager, a Deputy Global Manager, Programme Specialists responsible for matrixed country support and focal area guidance, Programme Specialists for Knowledge Management and for M&E, and Programme Associates.

At the country level, UNDP Country Offices located in more than 170 countries play a key role in providing the necessary support at the national level. UNDP provides oversight functions of the programme at the global and national levels. In particular, with UNDP's nearly universal presence, its Country Offices have supported the start-up of SGP Country Programmes, recruitment of national coordinators and programme assistants, local supervision, and resource mobilization. The UNDP Country Offices provide, as per request by and as agreed with UNOPS, any needed operational oversight for the SGP Country Programme. The UNDP Resident Representative or delegated staff is a member of the SGP National Steering Committee. While the SGP NC reports to the Global Manager and CPMT as the primary supervisor for global technical and substantive matters, the NC has the UNDP RR as secondary supervisor, in particular on assuring that he/she performs according to the high professional and ethical standards of the UN. In a limited number of countries, a National Host Institution (NHI), contracted through UNOPS, supports the administration of the programme

Importantly the SGP National Steering Committee (NSC) in each country is composed of government representatives and a majority of nongovernmental membership to reflect the programme's mandated focus for CSO capacity building. The NSC provides overall country guidance and direct linkages to national policy-making, development planning, knowledge dissemination, and leveraging of SGP's catalytic role. The NSC is responsible for developing the Country Programme Strategy (CPS) for the Operational Phase, selecting and approving projects, and for ensuring their technical and substantive quality with support from a Technical Advisory Group (TAG). In addition, NSC members are expected to support the Country Programme in resource mobilization and in mainstreaming SGP lessons learned and successes in other national contexts. The primary functions of the SGP Country Programme Office and NSC are the identification, review, and approval of qualified grant proposals that support priorities.

Finally the SGP Country Programme Office, typically consisting of the National Coordinator (NC) and Programme Assistant (PA), runs the operation of the SGP Country Programme on a day-to-day basis. The NC is responsible for all aspects of country programme operations and management, including implementation, management, partnership development, knowledge management and M&E of the programme. When fulfilling his/her functions, and in adherence to the country-driven nature of the programme, the NC seeks guidance and support from, and in a sense also reports to the National Steering Committee (NSC) on progress in programme implementation. Most SGP Country Programme Offices are hosted by the UNDP Country Office, providing required local supervision and oversight of the program. In a limited number of countries, a National Host Institution (NHI) is selected among the national CSO institutions with necessary capacity. The SGP CPS is developed in each country to guide SGP operations, enabling the strategic use of resources and articulating how the SGP supports national and GEF strategic priorities. The SGP Country Programme Office is responsible for all aspects of SGP management in the country, in particular in coordination with the NSC, while also facilitating global coherence in SGP implementation through its reporting to the CPMT.

During GEF7, the SGP will proactively coordinate with several GEF-7 Impact Programs and multi-agency initiatives, including inter alia the Congo Basin Initiative, Dryland Landscape initiatives, and the Inclusive Conservation Initiative (ICI). Specifically, about the ICI, SGP has been in close communication with the GEF Secretariat, the GEF Indigenous Peoples' Advisory Group (IPAG), and relevant GEF agencies since the early formulation stage of the GEF7 Inclusive Conservation Initiative (ICI). For example, during the UN Permanent Forum on Indigenous Issues (UNPFII) in 2019, SGP worked with the GEF Secretariat to convene a group of concerned GEF agencies to discuss comparative advantage and possibilities for synergies and lessons learned for implementation pertinent to the ICI. As articulated in the ICI PIF approved by the GEF Council in Dec 2019, SGP will continue to work with the ICI to leverage the experience, networks and lessons from the SGP in the following ways, to: (i) seek recommendations from IPLC partners who are SGP partners and graduate organizations that may be potential candidates for ICI investments in selected geographies and territories; (ii) engage with the SGP during the formation of the Interim Steering Committee as part of the PPG consultation phase of the ICI over the course of 2020; (iii) build on and learn from SGP collaboration and consultation experiences with IPLCs in target ICI geographies and territories; (iv) engage on policy initiative with SGP in ICI countries, including appropriate recognition of indigenous peoples' and community conserved areas and territories (ICCAs) as recognized by the CBD Aichi targets, 2014 IUCN World Parks Congress, and post-2020 CBD negotiations; (v) collaborate on CSO-Government dialogues in ICI countries with respect to IPLCs land, territories and resources; and (vi) develop and collaborate on learning and capacity building initiatives between and among SGP and ICI, including with respect to the design of Indigenous Peoples fellowship programmes.

Of special relevance to the GEF7 Inclusive Conservation Initiative will be the Global Support Initiative for Indigenous Peoples and Community-Conserved Territories and Areas (ICCA-GSI), supported by the Government of Germany (BMU), and implemented by the SGP in 26 countries at the global level. The ICCA GSI has supported the networking and creation of CSO coalitions in support of protected and conserved areas at national, regional and global levels. Notable results relevant to the ICI may include: (i) analysis of threats and opportunities for ICCAs in target geographies; (ii) assessment of legal and policy frameworks required to enhance ICCA recognition; and (iii) development and field-testing of tracking tools including the ICCA Security Index, self-strengthening methodology for territories of life, and protected area governance scorecards. In addition, IUCN and Conservation International may engage and learn from SGP OP6 innovation programmes and their outputs for areas of thematic investment under ICI including work on youth and climate change, indigenous peoples' access to energy, artisanal and small-scale gold mining (ASGM), and the blue economy.

[1] Memorandum of Understanding For a Strategic Partnership Between the United Nations Development Program (UNDP) and the United Nations Office for Project Services (UNOPS), signed by Ad Melkert, UNDP Associate Administrator and Jan Mattson, UNOPS Executive Director, June 5, 2009

[2] This UNOPS central management team or small grants cluster with fully dedicated staff and based in New York is for fast and efficient delivery as well as regular face-to-face meeting on admin and finance matters with CPMT.

7. Consistency with National Priorities

Describe the consistency of the project with national strategies and plans or reports and assessments under relevant conventions from below:

NAPAs, NAPs, ASGM NAPs, MIAs, NBSAPs, NCs, TNAs, NCSAs, NIPs, PRSPs, NPFE, BURs, INDCs, etc.

The project is consistent with a large number of Rio Conventions and other environmental agreements including inter alia NAPAs, NAPs, ASGM NAPs, MIA, NBSAPs, NC, TNA, NCSA, NIP, PRSP, NPFE and BUR. The SGP is a country-driven programme and operates in countries where specific requests to initiate the programme have been received from the appropriate national authorities, represented by the GEF Operational Focal Point (OFP). By first requesting and subsequently supporting implementation of the SGP, a country demonstrates that the SGP will be a country-driven and owned initiative, supporting community-level and civil society environmental projects.

As mentioned above, SGP grant-making for an operational phase proceeds based on a Country Programme Strategy (CPS) developed by each participating SGP country. While the GEF Council-approved PIF and the CEO Endorsement Document provide the global strategic framework, the CPS lays down country priorities and directions of community and civil society action to be supported with grants. The CPS will identify the landscape/seascape the country programme will focus on for greater impact and complementation with other national efforts the process requires a review of national strategies and action plans, such as NBSAPs, NAPs, NIPs, TNAs, PRSPs, NPFE, etc. to also include those related to sustainable development objectives and goals. To ensure consistency with such national strategies and plans, the CPS template includes a specific section in which a table details the SGP country programme's alignment with such strategies and plans. The CPS development is facilitated by the SGP country team and involves iterative consultations with key national stakeholders from government, civil society, academia, and other sectors.

SGP country-drivenness and alignment to key national strategies and plans is continually reinforced both by the National Steering Committee (NSC) and/or the National Focal Group (NFG) for countries under an SGP Sub-regional Programme modality. The NSC is composed of key government officials and leading representatives of the non-governmental community. The GEF OFP is a core member of this NSC. The NSC conducts the review and endorsement of the SGP CPS as well as the review and approval of grant projects. NSC members also provide support in resource mobilization and in linking programme successes and lessons learned to national planning and policy-making, thus necessitating their taking on the task of strategically positioning the country programme and its projects to complement with other related national efforts. As mentioned above, SGP has also established TAGs to broaden the pool of experts in support of the proper design or review of submitted grant proposals. To further assure that SGP projects will fully support Convention-related priority action in the country, experts from the country's Convention focal point agencies are invited to be members of the TAG. UNDP, as the implementing agency, also contributes to ensuring SGP's consistency with national priorities especially along sustainable development objectives shared with the UNDP GEF as a core member of the SGP NSC. As such, critical information from national assessments and programming that the UNDP Country Office (UNDP CO) is often asked to facilitate flows to inform the SGP country programme through NSC meetings, or also directly when the SGP Team participates in UNDP CO strategy workshops and related meetings. In certain cases, the SGP serves as a delivery mechanism to UNDP CO programs and projects linked to the implementation of national strategies and plans that require the meaningful participation of communities and civil society.

Finally, the SGP Country Teams are increasingly asked to actively participate in GEF National Portfolio Formulation Exercises (NPFs) by presenting the accomplishment and progress of its past operational phase and the strategic direction and plans for an upcoming phase. Whenever invited, the SGP also makes the same presentations during GEF's Extended Constituency Workshops (ECWs). In both cases, SGP acquires valuable information and feedback to ensure higher level alignment while it plans very local community level grant-making.

8. Knowledge Management

Elaborate the "Knowledge Management Approach" for the project, including a budget, key deliverables and a timeline, and explain how it will contribute to the project's overall impact.

Knowledge Management is crucial to SGP as it supports wider adoption of the innovative solutions in its portfolio at national and global levels. All SGP projects incorporate training and capacity building components that help improve the capacities and skills of the CSOs and communities. All SGP CPS documents integrate knowledge management as an important component. At the portfolio level, SGP provides support through strategic training on key areas for the successful implementation such as through stakeholder workshops and knowledge dissemination means (such as knowledge fairs and network aggregation of grantee networks). For instance, in OP6, SGP supported 214 projects that strengthened the capacities of 3,490 organizations and 2,793 community-based organizations, improving the capacities of 95,174 people to address global environmental issues at the community level. The SGP also supported 2,547 peer-to-peer exchanges and 3,754 training sessions and produced 4,270 project fact sheets, case studies, brochures, publications, videos and how-to toolkits to capture good practices.

In addition to these, SGP uses several strategies to support knowledge exchange and networking of its grantees and partners. During OP6, around 78% SGP country programmes strengthened grantee networks, 74% connected grantees with higher capacity NGOs, 80% promoted peer-to-peer exchanges, 72% organized training on different subjects, 72% connected grantees with government extension services. These will be strengthened during the GEF-7 period through three inter-related initiatives namely: (a) the Digital Library of Community Innovations for the Global Environment as an expanding section of the SGP website that curates tested methods and technologies, many of them original innovations, developed by SGP and its partner CSOs to facilitate knowledge transfer and technology from a community in one country to other communities, CSOs, policymakers and development practitioners; (b) 'Communities Connect' as a collaborative platform started in partnership with the GEF CSO Network, to promote the solutions created by communities and civil society organization to sustainable development issues; and (c) the "South-South Community Innovation Exchange Platform" that promotes knowledge exchange between SGP countries to encourage cross country/region replication of good practices.

Beyond this, SGP is also contributing to UNDP's work in South-South cooperation and has collaborated with the United Nations Office for South-South Cooperation. A total of 4 case studies were contributed to the second volume of the "Good Practices in South-South and Triangular Cooperation for Sustainable Development", a publication that features more than 100 notable solutions at the national, sub- regional, regional and global levels to crucial challenges faced by developing countries ranging from efforts to eradicate poverty, reduce inequality, support climate change action and create peaceful and cohesive societies. These will be continued during the project period. **(Please see section Knowledge Management of the UNDP Project Document for details)**

9. Monitoring and Evaluation

Describe the budgeted M and E plan

The details of the monitoring and evaluation plan are included in **Section V – Monitoring and Evaluation of the UNDP Project Document**. Briefly, the GEF SGP developed a Monitoring and Evaluation Strategy (2019) which builds a model of change for SGP results that facilitates an understanding of how the programme creates change, and defines SGP results in GEF-7 as follows: (i) global environmental benefits; (ii) socio-economic benefits; (iii) innovation; (iv) capacity development; and (v) broader adoption of SGP (scaling up, replication, mainstreaming and policy influence). With the above results in focus, a measurement system has been developed, which is compliant with [GEF Results Guidelines](#), other [GEF Policies](#) and [UNDP Strategic Plan Results Framework](#).

The broad categories for SGP’s M&E budget are as below and the M&E work plan is presented in the table that follows:

1.	Field based monitoring (including travel)	
-	Country level (110 countries)	\$1,270,000
-	Global level (CPMT)	\$ 283,000
2.	Impact reviews / evaluations	\$ 300,000
3.	Audits	\$ 480,000
4.	SGP database	\$ 200,000
5.	Quality assurance / technical assistance	\$ 180,600
Total		\$ 2,713,600

Building on a solid foundation from the previous operational phases, the development of a multi-year SGP Results Based Management (RBM) Strategy, capturing key objectives, processes and responsibilities, is an immediate step going forward. An agile RBM system integrated across project, country and global levels, will address needs for accountability, adaptive management with informed decisions and actions, and learning from both success and failure. Principally, across the three levels, there will be: (i) a focus on developing normative frameworks; (ii) development of an enhanced online database as a mechanism to manage and report on the varied needs of grantees, country programmes and global portfolio; (iii) build robust capacities of people, processes, and systems- and institutionalize a programme-wide RBM culture; (iv) enhance data quality and assurance mechanisms; and (v) introduce M&E innovations to capture non-linear and long term developmental change and impact. The details of the M&E plan at both the global level and country level is given in the table below.

M&E Activity	Purpose	Responsible Parties	Budget Source	Timing
PROJECT LEVEL				
Project M&E plan	Ensure compliance with minimum project design standards and norms	Grantee and NC	NC staff time	At project commitment stage
Participatory Project Monitoring	Monitoring; learning; adaptive management	Grantee	Covered under project grant amount	Ongoing throughout project implementation
Project Evaluation <i>(as necessary / cost effective)</i>	Assess project effectiveness	Grantee, NC, NSC, third party	Covered under project grant amount	Upon completion of project activities, as appropriate
Project Progress Reports <i>(Midterm progress report, final progress report)</i>	Reporting of results; adaptive management	Grantee	Covered under project grant amount	At mid-term and final tranche
Financial Reports <i>(usually 2, per agreed disbursement schedule)</i>	Financial accountability and assessment of cost-effectiveness	Grantee	Covered under project grant amount	At each disbursement request
Project monitoring <i>(as necessary / cost effective[1])</i>	Monitoring, adaptive management	NC, NSC	Country Operating Budget	At least once per project cycle
Maintain project description/results in global project database	Enable efficient reporting to CPMT, GEF, donors, others	PA and NC	Staff time	At start of project, on ongoing basis, and at project completion
COUNTRY LEVEL				
M&E Activity	Purpose	Responsible Parties	Budget Source	Timing
Country Programme Strategy elaboration	Framework for action including identification of community projects.	NC, NSC, country stakeholders, grantees	SGP planning grant	At start of new period
As part of NSC meetings, ongoing review of project results and analysis. This includes an Annual CPS Review.	Assess effectiveness of projects, country portfolio; learning; adaptive management.	NC, NSC, UNDP Country Office. Final deliberations shared/ analyzed with CPMT colleagues.	Staff time, Country Operating Budget	Minimum twice per year to ensure new CPS is on track to achieve its results and make timely and evidence-based modifications to CPS as may be needed[2].
Annual Monitoring Report Survey[3]	Enable efficient reporting to CPMT and GEF. It serves as the primary tools to record and analytically present results to donors.	NC/PA in close collaboration with NSC. CPMT supports the process.	Staff time	Once per year in June- July

M&E Activity	Purpose	Responsible Parties	Budget Source	Timing
Country Portfolio Review	Methodological results capture for impact level change. Supports reporting to stakeholders, learning, and strategic development/ implementation of CPS.	NC, Global M&E staff	SGP planning grant	Once per operational phase
SGP Database	Ensure recording of all Project and Country Programme inputs in SGP database.	NCs, PAs	Staff time	Throughout the operational phase.
Audit	Ensure compliance with project implementation/management standards and norms.	UNOPS/ External	Global Operating Budget	Annually for selected countries on risk-assessment basis
GLOBAL LEVEL				
Implementation of new SGP M&E strategy	Strengthened results management across the three levels.	CPMT	Global M&E budget and staff time	Ongoing
Revamping and maintenance of SGP Database	Streamlining, alignment with other systems (such as one UNOPS), serve as an instrument to implement new strategy	CPMT	Global M&E budget and staff time	Ongoing
SGP Annual Monitoring Report	Accountability, learning, presentation of results to donor	CPMT with inputs from NCs	Global M&E budget and staff time	Annually
Production of annual data analytics- by regions, typologies	Availability of data for decision making and presentation of results	CPMT	Global M&E budget and staff time	Annually
Administration of Impact Reviews across countries and themes	Assess change due to SGP at meta level; support generation of methodologically sound evidence	CPMT working to support NCs	Global M&E budget and staff time	Ongoing
Programme Delivery Reports (GEF Financial Reporting)	Assessment of implementation efficiency	UNOPS to UNDP-GEF	Covered under UNOPS operating costs	Quarterly
SGP Reporting for GEF APMR	Presentation of results to donor as financial mechanism for Conventions	CPMT to GEF Secretariat	Global operating budget and M&E budget and staff time	At least one month prior to deadline for GEF Secretariat reporting
Inputs to UNDP and GEF country and thematic evaluations	Provide lessons; assess effectiveness, relevance, results and impact	CPMT, SGP country teams, UNDP and /or GEF Evaluation Offices	Covered under budgeted staff time	<i>Ad Hoc</i>
SGP Independent Evaluation	Assess effectiveness, continued relevance, cost-efficiency; learning; adaptive management	CPMT, UNDP and GEF Independent Evaluation Offices	Global operating budget and M&E budget and staff time	Once per Operational Phase

[1] To ensure cost-effectiveness, project level monitoring and evaluation activities, including project site visits, are conducted on a discretionary basis, based on internally assessed criteria including (but not limited to) project size and complexity, potential and realized risks, and security parameters.

[2] Please note OP7 CPS will be regarded as a dynamic document and can be updated by the SGP country team and NSC on a periodic basis to reflect any necessary adjustments to ensure maximum impact. This CPS update process should be part of the Annual CPS Review.

[3] Timely and quality country level submissions to Annual Monitoring Process are mandatory. As a Global Programme, it enables aggregated reporting by CPMT to GEF, UNDP and other stakeholders.

10. Benefits

Describe the socioeconomic benefits to be delivered by the project at the national and local levels, as appropriate. How do these benefits translate in supporting the achievement of global environment benefits (GEF Trust Fund) or adaptation benefits (LDCF/SCCF)?

During the project period, the SGP will deliver the following important socio-economic results:

- SGP interventions will directly impact 200,000 beneficiaries out of which 50% are female through enhanced capacities and improved livelihoods and lives;
- SGP will support CSO-Government-Private Sector dialogues in at least 15 countries to have scaled up policy impact
- Under social inclusion, the SGP will ensure that 30% of its projects are led by women, that at least 50% of all SGP beneficiaries are women;
- At least 20 percent of relevant SGP country programs integrate appropriate models to engage youth and 15 percent of countries have targeted support for indigenous peoples;
- At least 15 countries will undertake South-South exchanges such that cross-fertilization and learnings between communities, CSOs and other partners are promoted;

The interventions from the SGP contributes to global environmental benefits at multiple levels, starting from the global level, prioritized at the national level through the CPS, and translated into small grant actions in the field. Firstly, SGP priorities will be fully aligned to that of the GEF-7 Programming Directions Paper and its outcomes to meet the GEF-7 targets. Secondly, greater attention will be focused to creating synergy among individual projects using landscape or seascape approaches, as well as taking all opportunities for complementation with larger projects of the GEF and other donor agencies. Thirdly, SGP local initiatives will link to global initiatives and platforms as well as fostering joint efforts with global networks. Finally, the implementation of “Grantmaker+” set of roles has been designed to support scaling up, mainstreaming and replication that will provide higher level capacity development (i.e. IP Fellowships), networking and institutional support, knowledge sharing (e.g. through South-South exchanges), and advocacy mechanisms at national

levels (i.e. CSO-Government-Private Sector Dialogue Platforms), and where relevant, all of these to extend to regional and global levels. Insofar as the SGP interventions promote local socio-economic benefits such as improvement of local livelihoods, strengthening capacities of local communities, these will take into consideration the underlying aim to reduce threats from the local level to globally important environmental assets, raising awareness and mobilizing civil society and wider public towards supporting environmentally friendly practices and approaches. In this way, the delivery of the socio-economic and other local benefits contribute towards the delivery of global environmental benefits.

ANNEX A: PROJECT RESULTS FRAMEWORK (either copy and paste here the framework from the Agency document, or provide reference to the page in the project document where the framework could be found).

Annex A: Project Results Framework

This project will contribute to the following Sustainable Development Goal (s): Goals 7, 13, 14, 15, 17				
This project will contribute to the following UNDP SP Outputs: 1.4.1; 2.1.1; 1.5.1; 2.5.1; 3.4.1				
	Objective and Outcome Indicators	End of Project Target	Verification Means	Assumptions
Project Objective:	Mandatory Indicator 1: # direct project beneficiaries disaggregated by gender (individual people)	100,000 (male) 100,000 (female)	Annual Monitoring Report (AMR)	All countries are incorporating social inclusion areas as part of CPS design and implementation
	Mandatory Indicator 2: # indirect project beneficiaries disaggregated by gender (individual people)	300,000		
Project component 1	Community-based conservation of threatened ecosystems and species			
Outcome 1 - Community-based models and biodiversity friendly practices and approaches promoted for conservation and sustainable use of threatened ecosystems and species in important terrestrial and coastal/ marine ecosystems	Indicator 3: Area of landscapes under improved management to benefit biodiversity (hectares) (GEF core indicator 4.1)	1,100,000 ha	AMR Grantee Monitoring Report	Mobilized multi-stakeholder support for the landscape/seascape approach (including the government, local CSOs/CBOs, NSCs)
	Indicator 4: Marine protected areas under improved management effectiveness (hectares) (reported under GEF core indicator 5)	50,000 ha		
	Indicator 5: Area of marine habitat under improved practices to benefit biodiversity (hectares; excluding protected areas) (GEF core indicator 5)	50,000 ha	Impact reviews SGP database	Technical support provided, along with capacities, to facilitate the landscape/ seascape approach

Outputs to achieve Outcome 1	<p>Output 1.1: Community-based NRM measures that integrate biodiversity and sustainable community use including management and governance of PAs and ICCAs developed</p> <p>Output 1.2: Sustainable biodiversity friendly community oriented natural resources-based enterprises and sustainable livelihood activities supported</p> <p>Output 1.3: Community-based measures supporting improved management of PAs including ICCAs promoted among PA adjacent communities and within ICCAs</p>			
Project component 2	Sustainable agriculture and fisheries, and food security			
Outcome 2 - Climate-smart integrated practices improve productivity, food security, and livelihoods of smallholder farmers and supports achievement of national LDN targets.	Indicator 6: Area of landscapes under sustainable land management in production systems (hectares) including fisheries (GEF core indicator 4.3)	140,000 ha	AMR Grantee Monitoring Report Impact reviews SGP database	Landscapes address a production system Collaboration with full-sized projects to support vertical linkages for sustainable agriculture and fisheries, and food security
	Indicator 7: Area of degraded agricultural lands restored (hectares) (GEF core indicator 3.1)	100,000 ha		
	Indicator 8: Number of SGP countries supporting linkages and partnerships for sustainable food production practices (such as diversification and sustainable intensification) and supply chain management including in sustainable fisheries management	50 countries		
Outputs to achieve Outcome 2	<p>Output 2.1: Community level SLM actions that reduce land degradation, support restoration and aligned with national LDN targets</p> <p>Output 2.2: Climate-resilient SLM technologies adapted to local conditions implemented</p> <p>Output 2.3: Guidelines and best practices on SLM technologies developed and disseminated</p> <p>Output 2.4: Viable linkages and value-chain improvement initiatives that enhance production and enhance income supported</p>			
Project component 3	Low-carbon energy access co-benefits			
Outcome 3 - Low carbon, viable and appropriate technologies and approaches demonstrated and deployed across sectors. Initiatives scaled up that improve community energy access and build a low carbon infrastructure in line with	Indicator 9: Increase in installed renewable energy capacity from local technologies (e.g. on types of renewable energy technology biomass, small hydro, solar).	150 KW	AMR Grantee Monitoring Report Impact reviews	Communities and CSOs have innovative and implementation capacity
	Indicator 10: Number of typologies of community-oriented, locally adapted energy access solutions with successful demonstrations or scaling up and replication	25 local energy access solutions		

larger national frameworks such as SDGs and NDCs.	Indicator 11: Hectares of forests and non-forest lands with restoration and enhancement of carbon stocks initiated.	7,500 hectares	SGP database	
Outputs to achieve Outcome 3	<p>Output 3.1: Low-cost bottom-up energy solutions promoted including measures to reduce forest degradation and deforestation</p> <p>Output 3.2: Community innovations, including technologies for low carbon energy options including financing opportunities documented</p> <p>Output 3.3: Capacity building and transfer of knowledge for effective deployment of low carbon, sustainable energy solutions at community level</p>			
Project component 4	Local to global coalitions for chemicals and waste management			
Outcome 4 - Innovative community-based tools and approaches demonstrated, deployed and transferred. Organize and strengthen multi-stakeholder coalitions with support from sound chemicals and waste management platforms.	Indicator 12: Quantity of POPs/Mercury containing materials and products directly avoided (GEF core indicator 9.6)	150 tons	AMR, SGP database	Issue buy-in existing at communities and CSO level in a given context
	Indicator 13: Number of local to global coalitions and networks established and/or strengthened (e.g. IPEN and Zero Mercury Working Group)	2 coalitions	Grantee Monitoring Report	
	Indicator 14: Number of SGP countries working on increasing awareness and outreach for sound chemicals, waste and mercury management.	25 countries	Impact reviews SGP database	
Outputs to achieve Outcome 4	<p>Output 4.1: Community-based innovative, affordable and practical solutions to chemicals and waste management supported</p> <p>Output 4.2: Consolidation of efforts on pesticide management, waste management, and mercury to promote local to global coalitions and networks</p> <p>Output 4.3: Community-level artisanal and small-scale gold mining in reducing/eliminating use of mercury demonstrated</p>			
Project component 5	Catalyzing sustainable urban solutions			
Outcome 5 - Appropriate integrated community-oriented sustainable urban solutions in partnership with	Indicator 15: Number of SGP countries with improved capacities to promote community-driven integrated solutions for low-emission and resilient urban development.	12 countries	AMR, SGP database Annual Country	Synergize efforts with Global Platform for Sustainable Cities (GPSC)

government and private sector. These may often be first time innovations and are administered with a socially inclusive lens.	Indicator 16: Number of community-based urban solutions/ approaches (including chemical and waste management, energy, transport, watershed protection, ecosystem services and biodiversity) deployed.	12 urban solutions	Monitoring Report	Identified pockets of geographic areas or thematic issues to focus on (in the absence of landscape/ seascape approach here)
Outputs to achieve Outcome 5	Output 5.1: Integrated community-oriented sustainable urban solutions in partnership with private sector and government identified and implemented Output 5.2: Capacity building for key service providers and local communities on low-emission and resilient urban development solutions			
Project component 6	Supporting broader adoption of community impact and innovation			
Outcome 6 - CSO-Government-Private Sector Policy and Planning Dialogue Platforms promote community voices and participation in global, national and sub-national policy/strategy development on global environment and sustainable development issues.	Indicator 17: Number of high-level policy changes attributed to increased community representation through the CSO-government-private sector dialogues.	At least 50% of countries reporting significant policy outcomes	AMR, Annual Country Monitoring Report, Country impact reviews	Government responds to consultative processes Dialogues/ Exchanges undertaken in mature SGP country programmes/ countries with advanced community results
	Indicator 18: Number of representatives from social inclusion group (indigenous people, women, youth, persons with disability, farmers, other marginalized groups) supported with meaningful participation in dialogue platforms.	2 representatives from social inclusion groups per dialogue platform		
Outcome 7 - South-South Exchange promoted to broker knowledge, build capacities and facilitate partnerships between communities, CSOs and other partners across countries on global environmental issues.	Indicator 19: Number of countries reporting adoption of improved practices or approaches as a result of South-South exchanges between communities, CSOs and other partners across countries.	10 countries		
	Indicator 20: Number of South-South exchanges at global and regional levels to transfer knowledge, replicate technology, tools and approaches on global environmental issues.	15 South-South exchanges		
Outputs to achieve Outcome 6 and 7	Output 6.1: National-level targeted CSO-Government dialogues Output 6.2: Global CSO-government and other stakeholder dialogues Output 7.1: South-South exchanges identified, supported and documented			

Project component 7	Promoting social inclusion			
Outcome 8: Social inclusion, particularly empowerment of women, indigenous peoples, youth and people with disabilities, is mainstreamed and enhanced in SGP programming on environment and livelihood improvement	Indicator 21a: Number of SGP projects led by women	30% of SGP portfolio	AMR Annual Country Monitoring Report SGP database	Social and Environmental Standards are incorporated at country and project levels; Country programme level management, in particular National Steering Committees, reflect a socially inclusive model. Marginalized groups such as the youth and the disabled people are aware of and interested in working with SGP
	Indicator 21b.: Number of projects contributing to closing gender gaps related to access to and control over natural resources	20% SGP portfolio		
	Indicator c: Number of projects that improve the participation and decision-making of women in natural resource governance	30% SGP portfolio		
	Indicator 21d: Number of projects that target socio-economic benefits and services for women	70% SGP portfolio		
	Indicator 22: Number of SGP countries that have targeted support for Indigenous Peoples in terms of country level programming and management.	20% of SGP country programmes		
	Indicator 23: Number of SGP countries that demonstrate appropriate models of engaging youth and for persons with disability.	15% of SGP country programmes for each group		
Outputs to achieve Outcome 8	Output 8.1: Increased involvement and active participation and empowerment of women, indigenous peoples, youth and persons with disabilities mainstreamed in SGP initiatives Output 8.2: Expanded Indigenous Peoples' Fellowship Program implemented Output 8.3: Guidelines and best practices on engaging youth and persons with disabilities will be developed and widely shared			
Project Component 8	Monitoring & evaluation			
Outcome 9 - A common, robust M&E strategy is developed and implemented in all countries at all levels (project, country and global)-	Indicator 24: Number of SGP country teams administering results management modalities in programme design, implementation and overall decision making using participatory mechanisms.	All SGP countries	AMR Annual Country Monitoring	Adequate availability of resources. M&E capacities built across global, country

establishing transparency, coherence and evidence-based decision making.	Indicator 25: Number of country/cross-country impact reviews undertaken that generate evidence of SGP impact and lessons learnt.	3 impact reviews	Report SGP database	and project levels. Mechanisms of quality assurance and methodologically-sound thought production in place.
Project Component 9	Knowledge management			
Outcome 10 - Networking and knowledge sharing leverage local actions for global change to safeguard global environment	Indicator 26: Number of SGP countries using citizen-based knowledge platform (digital library of community innovations) to document and curate community-based solutions to environment issues. Indicator 27: Number of knowledge fairs	All SGP countries	SGP intranet AMR	Access to internet connectivity is available. Communities and CSOs have capacity to curate their knowledge.
Outputs to achieve outcome 9 and 10	Output 9.1: SGP M&E system deployed at global, country and project levels Output 9.2: Selected country level impacts reviews conducted Output 10.1: Citizen-based knowledge platform supported generating thematic and geographic specific knowledge products			

ANNEX B: RESPONSES TO PROJECT REVIEWS (from GEF Secretariat and GEF Agencies, and Responses to Comments from Council at work program inclusion and the Convention Secretariat and STAP at PIF).

ANNEX C: Status of Utilization of Project Preparation Grant (PPG). (Provide detailed funding amount of the PPG activities financing status in the table below:

ANNEX D: CALENDAR OF EXPECTED REFLOWS (if non-grant instrument is used)

Provide a calendar of expected reflows to the GEF/LDCF/SCCF/CBIT Trust Funds or to your Agency (and/or revolving fund that will be set up)

ANNEX E: Project Map(s) and Coordinates

Please attach the geographical location of the project area, if possible.

Submitted to GEF Secretariat Review
