Dear

**RE: ENDORSEMENT LETTER FOR MEDIUM SIZE PROJECT –  
INTEGRATING VULNERABILITY AND ADOPTION TO  
CLIMATE CHANGE INTO SUSTAINABLE DEVELOPMENT  
POLICY PLANNING AND IMPLEMENTATION SOUTHERN AND  
EASTERN AFRICA**

---

The above named project was submitted to the National Operation Focal Kenya by Climate Change Focal Point.

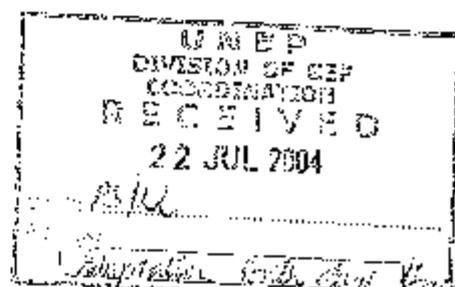

It is noted that the project is designed to promote the implementation of Article 4.1 (e) and (f) – by capturing and contributing to efforts underway to mainstream or integrate climate change, and adaptation to climate change specifically, into sustainable development plans and planning practices; and to launch a pilot project in selected countries of Eastern and Southern Africa, which have been facing increasing impacts of Climate Change.

The project will also address national development priorities of economic recovery for wealth and employment creation through implementation of small national projects under this umbrella.

The proposal has been discussed and approved by the National Technical Task Force. The National Operational Focal Point, therefore, endorses this proposal on behalf of the Kenya Government.

In my capacity as the Global Environment Facility (GEF) operational focal point for Malawi, I hereby endorse the attached project proposal for funding consideration by GEF.

The project shall contribute to integrating vulnerability and adaptation (V&A) to climate change into sustainable development planning IN Malawi and in the region under consideration. The project will also articulate the linkages between climate change and poverty reduction.

I have consulted all relevant stakeholders in Malawi and they are all in support of the project proposal.

I look forward to your positive consideration of this proposal and to the full realization of the project.
