Sr. Yannick Glemarec
Director Ejecutivo
PNUD-GEF
Presente

Estimado Sr. Glemarec

En referencia a la solicitud vía electrónica recibida de parte del Sr. Allyson Tinney Rivera el 20 de noviembre de 2007 para que la SEMARNAT manifieste su apoyo a la implementación del proyecto "Manejo Sustentable de los Recursos marinos Compartidos del Gran Ecosistema Marino del Caribe y Regiones Adyacentes" le comento lo siguiente:

Es interés de SEMARNAT participar en el proyecto citado toda vez que sus objetivos coinciden con las acciones, planes, programas y estrategias nacionales que SEMARNAT ha venido desarrollando, como es la Política Ambiental Nacional para el Desarrollo Sustentable de Océanos y Costas, la Estrategia Nacional de Cambio Climático y la Estrategia Nacional de Ordenamiento Ecológico del Territorio en Mares y Costas.

En la tabla de información del ANEXO A, encontrará las cantidades de co-financiamiento que SEMARNAT puede aportar "en especie" para algunos de los procesos y acciones (marcados en color azul), considerando aquellos rubros en los que la SEMARNAT tiene facultades y atribuciones mediante los diversos programas de trabajo ligado a diversos programas de trabajo institucionales que contribuirán a la instrumentación del Proyecto del Proyecto del Gran Ecosistema Marino del Caribe (GEMC) por un monto total aproximado en especie de \$110,000 dólares (USD).

Sin otro particular, aprovecho la ocasión para enviarle un cordial saludo.

ATENTAMENTE
EL DIRECTOR GENERAL

RE: Letter of Cofinancing in support of the
Project "CARIBBEAN LARGE MARINE
ECOSYSTEM-CLME"

Dear Mr. Glemarec:

The Authority for the Aquatic Resources of Panama (ARAP) is pleased to provide this letter indicating its commitment to partner with the Caribbean Large Marine Ecosystem (CLME) Project in the implementation of the Full-Sized Project Proposal entitled "**Sustainable Management of the Shared Marine Resources of the Caribbean Large Marine Ecosystem (CLME) and Adjacent Regions**".

The overall objective of the CLME Project is in line with the objectives and mandate of the Authority for the Aquatic Resources of Panama in striving for the sustainable management of the shared living marine resources of the Caribbean LME and adjacent regions through an integrated management approach. It is expected that the Project will provide the opportunity for the implementation of governance reforms at multiple levels that will permit sustainable development and ecosystem-based management of the shared LMRs (Living Marine Resources) of the Caribbean Large Marine Ecosystem and adjacent regions. Since most LMRs are shared in some way, these reforms can be expected to lead to the enhanced well-being of the Caribbean people through improved food security and enhanced livelihoods in communities that rely on the resources of the coastal and marine environment.

As an indicator of commitment and ownership, the Authority for the Aquatic Resources of Panama will support this project over the life of the project with regular funded staff and other in-kind services and/or cash for a value of \$ 3,268,000.

Sincerely,

REYNALDO PÉREZ-GUARDIA
General Administrator

Ministry of Agriculture, Forestry and Fisheries

RE: Letter of Co-financing in support of the Project “CARIBBEAN LARGE MARINE ECOSYSTEM-CLME”

Dear Mr. Glemarec:

The Department of Fisheries of the Ministry of Agriculture, Lands, Forestry and Fisheries St. Lucia is pleased to provide this letter indicating its commitment to partner with the Caribbean Large Marine Ecosystem (CLME) Project in the implementation of the Full-Sized Project Proposal entitled “**Sustainable Management of the Shared Marine Resources of the Caribbean Large Marine Ecosystem (CLME) and Adjacent Regions**”.

The overall objective of the CLME Project is in line with the objectives and mandate of the Department of Fisheries in striving for the sustainable management of the shared living marine resources of the Caribbean LME and adjacent regions through an integrated management approach. It is expected that the Project will provide the opportunity for the implementation of governance reforms at multiple levels that will permit sustainable development and ecosystem-based management of the shared LMRs (Living Marine Resources) of the Caribbean Large Marine Ecosystem and adjacent regions. Since most LMRs are shared in some way, these reforms can be expected to lead to the enhanced well-being of the Caribbean people through improved food security and enhanced livelihoods in communities that rely on the resources of the coastal and marine environment.

As an indicator of commitment and ownership, the Department of Fisheries will support this project over the life of the project with regular funded staff and other in-kind services for a value of \$1,025,400.00.

Sincerely,

.....
Vaughn Charles
Chief Fisheries Officer

RE: Letter of Cofinancing in support of the Project “CARIBBEAN LARGE MARINE ECOSYSTEM-CLME”

Dear Mr Glemarec:

Given the mandate of the Ministry of Labor, Technological Development and Environment to:

Formulate environmental policy at national level and coordinate all national environmental related activities, of which sustainable management of marine resources is of main importance,

the Ministry of Labor, Technological Development and Environment is pleased to provide this letter indicating its commitment to partner with the Caribbean Large Marine Ecosystem (CLME) Project in the following project activities as outlined in the Full-Sized Project Proposal entitled “**Sustainable Management of the Shared Marine Resources of the Caribbean Large Marine Ecosystem (CLME) and Adjacent Regions**”:

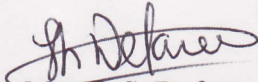

- 1. Project Management*
- 2. Analysis of Transboundary LMR Issues and Identification of Needed Actions*
- 3. Strategic Action Programme Development*
- 4. Implementing the governance framework*
- 5. Demonstration Fisheries Projects*

The overall objective of the CLME Project is in line with the objectives of the Ministry of Labor, Technological Development and Environment in striving for the sustainable management of the shared living marine resources of the Caribbean LME and adjacent regions through an integrated management approach. It is expected that the Project will provide the opportunity for the implementation of governance reforms at multiple levels that will permit sustainable development and ecosystem-based management of the shared LMRs (Living Marine Resources) of the Caribbean Large Marine Ecosystem and adjacent regions. Since most LMRs are shared in some way, these reforms can be expected to lead to the enhanced well-being of the Caribbean people through improved food security and enhanced livelihoods in communities that rely on the resources of the coastal and marine environment.

As an indicator of commitment and ownership, the Ministry of Labor, Technological Development and Environment will support this project over the life of the project with regular funded staff and other in-kind services and/or cash as identified in Table 1 attached.

Sincerely,

Permanent Secretary of the Ministry of Labor, Technological Development and Environment

Mrs. R.S. Defares
