B. INDICATIVE PROJECT DESCRIPTION SUMMARY

Project Objective: to enhance the sustainable management of forestry assets in targeted project areas, through increasing silvicultural thinning, improving afforestation and reforestation capacity, thereby providing additional employment opportunities, while increasing the provision of global public goods

Project Component	Financing Type ⁴	Project Outcomes	Trust Fund	(in \$)	
				GEF Project Financing	Co-financing
1.1 Improving silviculture and the sustainability of forest management	Inv	Forest structure improved in terms of species and age class diversity, stocking density, carbon capture and storage enhanced, reduced GHG emissions due to fossil fuel substitution, and forest conservation values enhanced. Intensive forest management standards will have been adopted in one of the regions, and improved standards and regulations drafted. New standards will have been trialed and replicated. ¹ This Data Sheet replaces the GEF PIF.

² Project ID number will be assigned by GEFSEC and to be entered by Agency in subsequent document submissions.

³ When completing Table A, refer to the GEF Website, [Focal Area Results Framework](#) which is an Excerpt from [GEF-6 Programming Directions](#).

⁴ Financing type can be either investment or technical assistance.

2.1 Improving forest fire prevention, monitoring, detection and suppression	Inv	Fewer forest fires caused by anthropogenic factors, fires detected sooner, reduced response times and less fire damage and reduced GHG emissions from fires	GEFTF	194,763	12,223,595
2.2 Improving forest fire prevention, monitoring, detection and suppression	TA		GEFTF	500,820	
3.1 Forest management information system and capacity building	Inv	Improved inventory and mensuration capacity leading to improved national level forest data. Functioning web based portal to allow for information sharing and increased transparency. Information system and database of carbon projects established. Forest training capacity will be enhanced for both technical and professional level staff in silviculture. There will be an on going training of in service staff. Rational use plan for radioactively contaminated projects will have been developed.	GEFTF	8,673	544,308
