Project Design	11. Is (are) the baseline project(s), including problem (s) that the baseline project(s) seek/s to address, sufficiently described and based on sound data and assumptions?	<p>11-29-11 Please address the following: COMPONENT 1 A well structured component to deliver new CMPAs. A few questions of clarification: 1. Are the "Public-Private-Civil Society PA Partnership Boards", new altogether in Seychelles? What makes the project proponents think they will work</p>	

	<p>provide examples of role models of these Boards working in similar environments (biogeographically and culturally). One example provided in Risk table (p. 11). In short, please develop the idea and make a case of its utilization in this project.</p> <p>2. What are the "Ecosystem conservation strategies" to be developed with NGOs? Please provide examples of existing similar strategies? As before, please develop the idea and make a case for its utilization in this project.</p> <p>3. What are the "Long term monitoring systems"? How these systems look like? Are these for the BD or the management of the islands? Who covers the recurrent costs after the completion of the GEF project?</p> <p>4. There is ample reference to Aldabra, but no proposed activities for the Atoll. Is that correct?</p> <p>COMPONENT 2</p> <p>It has two parts:</p> <p>First, the spatially-based decision support system for Integrated Natural Resource Management (INRM) and the Ecosystem-wide Zoning & Master Plan. Second, the restoration of the 60 has on Desroches and Alphonse.</p> <p>Questions:</p>	
--	---	--

	<p>decision support system and the zoning and master plan and take the necessary actions on the ground? While these two investments appear logical and desirable on paper, it is not clear if the Government of Seychelles is willing to sustain the effort by maintaining the systems, and most importantly, to use and enforce the outputs of these systems. The issue of enforcement is particularly difficult to visualize in such wide spread chain of islands where logistics are extremely difficult and costly.</p> <p>2. Are the following outputs likely to take effect and render tangible and measurable impacts on the ground? a) "Legally binding sustainable land management plans (SMPs) approved for islands that are targeted for development prior to the approval of investment projects", b) "Institutions with sectoral responsibilities for the development and conservation of the Outer Islands, together with relevant CSOs and engaged private sector partners, are capacitated for coordinating action at the wider landscape level on SLM".</p> <p>Please elaborate and make necessary changes/clarifications/additions in the PIF.</p> <p>Please also include relevant risks in table and provide a reasonable management strategy.</p> <p>Thanks.</p>
