The CEO  
Global Environment Facility

**Subject:- Letter of Endorsement for of National capacity  
self assessment NCSA project**

On behalf of the Government of Sudan and in our capacities as GEF National Focal Point and operational Focal Point we would like to express our strong support for the project proposal "National Capacity Self-Assessment for Global Environmental Management" We believe this project will improve the Sudanese capacities and enhance compliance with multilateral environmental agreements.

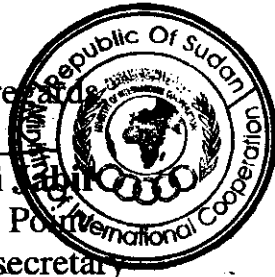

As you are aware, the GOS has signed global conventions and protocols that require concrete actions and measures to be taken at national and local levels to protect biodiversity and national heritage. The GOS is also implementing other key initiatives for biodiversity conservation, climate change, and area management.

All programmes have built in the objectives for capacity building at individual, institutional and systemic level and will support the NCSA process.

We wish to endorse the Government of Sudan's support to the above mentioned project for GEF funding, and to its implementation in the Sudan.

With best regards

  
Abdel Atti Jabir  
GEF Focal Point  
For/Undersecretary  
Ministry of International Cooperation

  
Dr. Nadir Mohamed Awad  
GEF Operational focal point
