

OFFICE MEMORANDUM

DATE: 07/17/2013 06:14 PM

FROM: Ibrahima Sow,

PHONE:

Sent by: OPSBPM

TO: See Distribution Below

SUBJECT: Comments have been sent by Ibrahima Sow for China: Contaminated Site Cleanup Project (P145533) (GE)

This is to notify you that **China: Contaminated Site Cleanup Project (P145533)** - was commented upon by Ibrahima Sow.

The following comments were entered:

Thank you for the opportunity to provide comments on the China contaminated sites project. The PCN is well designed with a clear baseline and a fair description of project components

Please note the following comments:

1. It is expected that the GEF funding will only be used for cleanup of two demonstration POPs contaminated sites. It is difficult to anticipate the level of complexity of the sites to be remediated. However we would like to see more contaminated sites cleaned up with \$ 15 million.
2. Under para 18, a) of the PCN document, we think the project should address mercury contaminated sites (as relevant) in addition to POPs sites as well as PFOS and other POPs contained in e-wastes, in addition to PBDEs..

Looking forward to our discussions,
